EVERY GARMENT SHOULD MAKE A DIFFERENCE

Here at Blåkläder, we want every garment we produce to make a difference. Wearing Blåkläder should be a statement of quality, function, smart design, sustainability and social development. Today, as ever, we are all about sustainable workwear made in a responsible chain of production.

A long-term perspective remains our main focus in regard to reducing the global footprint of our company and our products. We take responsibility by making our production process a little more sustainable every day. A large part of our process now runs on renewable energy, and we are constantly working on climate-smart logistical solutions.

Since starting up in 1959, it has been in our DNA to be a rebel, a challenger, and we intend to continue on the same track. Whilst we now live in an altered world after the irreversible effects of the Covid-19 pandemic, we continue to grow as a company. Not that we're resting on our laurels; Every day, we will continue to develop our products, ourselves and our working methods.

Although we're a rebel, we're a rebel with a firm foundation of responsibility and clearly defined goals. This does mean we face some tough tasks, but we relish the challenge to grow, inspired by the complex issues surrounding sustainability, environmental

responsibility and social justice. We stand firm in our conviction that we must constantly move forward and not dwell on past performance, but always grow and develop, focusing on what's important today. The same goes when it comes to doing our utmost for the men and women out in the field – for example by offering the best women's range on the market. This is something that's fully in line with our values and traditions.

Welcome to the Blåkläder family.

Sustainability has always been part of our story. Since Blåkläder began in 1959, we've been making sustainable workwear. The awareness of sustainability issues has increased over time and it now permeates every aspect of our global organisation.

We believe in sustainability. Because tomorrow matters.

SUSTAINABLE FREIGHT IS **ACHIEVED WITH FULL LOADS**

We know that our shared global environment is impacted by our freight transport operations. Therefore, we ensure that all containers leaving the factories where Blåkläder's garments are produced are filled to the maximum possible volume.

By working with a few carefully chosen factories and monitoring quality throughout the supply chain are reasons we are able to do this. Good planning and coordination are also key in enabling us to use transport options that are less expensive and less carbon intensive, for example using sea transport rather than air. Our optimised logistics processes and automated warehouse operations in Svenljunga also enable us to monitor and control the quality of our garments. This allows our customers to focus on their business and receive just-in-time deliveries of workwear without unnecessary delays. That's what we call sustainable.

We are aware of the discussions about the role and importance of plastic, and for us it is always a balancing act. We use plastic to prevent contamination during transportation, storage and handling, and to protect against moisture during shipping and storage. Without plastic bags protecting our garments, there is a risk they would become soiled, damaged by damp or mildew and would therefore not be fit for use and have to be scrapped. The carbon footprint of a plastic bag is far less than the cost to the environment of manufacturing an item of clothing. Consequently, from a sustainability perspective, it is easy to justify using hundreds of plastic bags, even if it stops just one t-shirt from going to waste. Naturally, all our plastic bags can be recycled.

We also ensure that our cardboard packaging boxes are dealt with responsibly. At present, 60% of cardboard used in production is reused.

SOCIAL RESPONSIBILITY

IN BLÅKLÄDER'S PRODUCTION PROCESS

Sustainability is an incredibly broad and important topic. For many, the term sustainability probably brings to mind the environmental aspects. But it is so much more than that. The socially sustainable practices of the factories producing the garments are extremely important to Blåkläder, and we have already accomplished a great deal in this area.

It cannot be stressed enough just how important it is for everyone to do the right things from a social sustainability perspective. This is important for employees of Blåkläder and especially so for the men and women who make the clothes in the six factories in Sri Lanka and in Myanmar.

So what action is being taken to create a socially sustainable and responsible work environment in these production facilities? A great deal is being done, of course. Below, we present some of the main attributes that make the production of Blåkläder clothes so highly respected.

The staff at our factories all have stable employment. Blåkläder and the factories have close working relationships and this helps to keep production at constant levels. This differs from other garment sewing factories where it is not unusual for staff to be sent home without pay or job security when there is a drop in order volumes.

All of our factories have an on-site medical facility staffed by a nurse and with regular visits from the company doctor. The facilities provide employees with medical care for everything from colds to antenatal check-ups. There are also agreements with nearby hospitals for medical emergencies.

The factories provide local support in the form of crisis counselling, supporting local organisations, community-building initiatives and other activities and projects. Donations are given to those who are in most need of help, including local orphanages.

There is considerable local community engagement from each factory and it is extremely important to encourage this involvement. Local traditions and festivals are celebrated together at the factories, which also organise festive events to promote a sense of cohesion and belonging among the employees.

The factories provide meals that are either free or subsidised. Free bus transportation to and from work is also available.

Although education is free, school books have to be paid for. So the employees' children are given the books and reading material they require. Students and student projects are also supported in various ways.

Blåkläder works constantly and with never-ending determination to integrate social responsibility into all aspects of its production operations around the world. Although we have come a long way, the journey is by no means complete since there are no quick fixes for the challenges that exist. In order to do things properly they shouldn't be rushed, and that is how Blåkläder intends to proceed.

INTO ETERNITY

The sun has a special significance for the people who live in the cold Nordic countries. It gives us strength and energy which we spread to all parts of our worldwide organisation.

Most of the millions of garments that Blåkläder produces every year come from the factories in Sri Lanka and in Myanmar. Solar panels on the roofs of these factories generate almost half the electricity required for the manufacturing operations. Solar energy drastically reduces carbon dioxide emissions and is both environmentally-friendly and cost-effective – we call it sun-win.

As we see it, sustainability is not just about the final garments, but is about every step on the journey. After 60 years in the business, one of our insights is that you do what you can to produce in a sustainable manner.

We therefore spent years examining how we could reduce energy consumption at our facilities while still meeting our exacting quality standards.

The sun as a natural source of energy was quite simply a brilliant idea. As well as the solar panels that power the factories, the roofs of the production buildings are fitted with what are known as prismatic skylights. These let natural sunlight into the interiors, while the UV radiation and heat are kept out. Automated sensors activate LED lighting when it is overcast or dark outside.

The result is reduced electricity consumption and a brighter and more pleasant workplace.

We can produce twice the amount of energy from a modern solar panel array than was possible just a decade ago, which made it an easy decision. We are continually increasing our use of renewable electricity as a future energy source.

It is also an important indicator that our efforts to become the most sustainable global player in the market are effective – and we aim to ensure it stays that way, today and going forward.

YOUR IMAGE OUR BUSINESS

What would a football team be without a club logo? Offering personalised clothing with the company's own logo is a cost-effective way to strengthen both team spirit and your brand. Your workwear says a lot about who you are both as a professional and as a company. Today it is more important than ever to be seen, and that is the reason to embrace smart marketing of your brand. Blåkläder will make sure you get great-looking, integrated company clothing - the way you want them. With us, it is quick and easy to place an order, and for repeat orders, you will have your clothes in just a couple of weeks.

IT MAY BE SIMPLE, BUT IT SENDS THE RIGHT MESSAGE

So why not do a little extra and embroider or transfer something on your work clothes that suits your profile? It can be a simple logo, but the signal it gives is different depending on which technology you wish to use. Not all materials are suitable for all different kinds of technologies, however, we guarantee that with our modern machinery and equipment there is always a technology that works for our garments. Our enthusiastic team is committed to ensuring that your logo is applied perfectly on your clothing. On average we deliver around 1 400 000 items of personalised clothing each year.

NOTHING IS TOO LITTLE OR TOO MUCH FOR US

Blåkläder has its own embroidery and transfer service, so your clothing can be personalised right after order picking, provided that your choice of transfer or embroidery is available.

Furthermore - unlike with many silkscreen print shops - we will never confront you with additional costs for start-up or set-up for orders of small quantities. Whether you need one item or one thousand, nothing is too little or too much for us, and every order is treated with the same passion and professionalism.

VALUE ADDED SERVICES

Heat-seal transfers are a cost-efficient way of displaying your corporate logo. The transfers are easy to apply and suitable for most of our garments.

EMBROIDERY

Machine-embroidered garments give that exclusive impression!

NAME AND TEXT DECALS

Our new plotter printer allows us to offer small runs of name and text decals. Ideal as chest or back decals. Available in several colours

EMBLEMS (name patches)

Emblems/name patches are increasingly popular, and available as stitched in place or velcro-based. On request, we can stitch name patches directly onto your garments, or if several people share the same workwear, with our velcro version, you can easily swap out the patches.

LENGTHENING/SHORTENING SERVICE

We offer a comprehensive collection of ready-made trousers, but you may still find that they are too long or too short. At Blåkläder we have our own in-house sewing and alterations service so we can lengthen or shorten your trousers on request.

4-WAY STRETCH

At Blåkläder, we constantly challenge the conventional. With over 60 years of experience, we have an enormous knowledge of workwear and how we should continue to develop them. New materials are constantly being created and our mission is to use them smartly and with respect for our end users.

The trousers in our new collection with fantastically soft and flexible 4-way stretch are perfect proof of that. A slightly thinner 4-way stretch material and elastic in

the waistband delivers the ultimate comfort, and together with the narrower fit and tighter look, these trousers create a difficult-to-beat overall impression.

With soft stretch, you will experience high comfort and mobility in combination with CORDURA® stretch for improved durability. Once you have tried them, you will never want to get changed, because they become a natural part of you.

1522 & 7192 4-WAY-STRETCH SERVICE TROUSERS

1422 & 7122 4-WAY-STRETCH SERVICE TROUSERS

BLÅKLÄDER GOES STRETCH

MOBILITY, FREEDOM, STRENGTH AND COMFORT. YOUR POSSIBILITIES ARE ENDLESS WITH THE NEW STRETCH TROUSERS FROM BLÅKLÄDER.

4-WAY STRETCH

Blåkläder now has trousers with fantastic 4-way stretch fabric, a soft material that is flexible in all directions to provide optimal comfort and performance. Craftsman, Hi-Vis, painters and service trousers are available with the 4-way stretch, several of them are also available in womens fit.

Our new range of trousers with either stretch panels, or made entirely of stretch materials are functional, comfortable and exceptional quality in a perfect symbiosis. It should not matter what you do for a living if you want all this, so we have developed stretch trousers for a number of professions where the demand is high. These are found below. Don't hesitate and do as Blåkläder, go stretch.

2-WAY STRETCH

Our 2-way stretch trousers are comfortable and hard-wearing, with some of the styles featuring stretch panels. The 2-way stretch offers superior comfort and ease of movement where most often needed - lateral stretch. Craftsmen, Hi-Vis, painters and industrial/service trousers are available with the 2-way stretch, with several of them also available in

STRETCH PANELS

PERFECT COMBINATION OF FUNCTION AND COMFORT

Blåkläder´s modern, functional and comfortable trousers with stretch panels keep you looking your best, even when you are working hard. The trousers are made in several different materials such as denim, lightweight, CORDURA® NYCO, CORDURA® Denim, Ripstop or cotton. Available in a variety of colours and models making it easy for you to find your favourite.

MAX: Our trousers with stretch panels on the seat, front, knees, crotch and other strategic zones provide maximum comfort where it's most needed. These trousers are an excellent choice for professionals who don't compromise when it comes to quality and mobility. The trousers marked with "MAX" shown below have more stretch panels.

MIN: Most of our trousers with stretch panels on calves, knees, crotch and other places are ideal for anyone looking for functional and comfortable work trousers. These trousers marked with "MIN" have fewer stretch panels but proudly deliver the level of performance demanded by professionals.

X1900

A MODERN FAVOURITE AMONG CRAFTSMEN

The X1900 Blåkläder collection consists of modern, extremely durable and comfortable craftsman trousers in high-quality materials that put functionality above everything else.

The X1900 collection includes trousers in 4-way stretch fabric and stretch denim. The fantastic 4-way stretch fabric provides the perfect balance of quality, function, style and comfort. This means that Blåkläder's work trousers offer the best of both worlds in terms of performance and comfort.

The trousers' knee pad pockets are reinforced with CORDURA® stretch fabric on the outside and stretch fabric on the inside for increased freedom of movement

Blåkläder never compromises on quality, and neither should you.

TAKE CARE OF YOUR KNEES

THEY SHOULD LAST A LIFETIME!

Most knee injuries are caused by poor ergonomics and inadequate protection during strenuous tasks. The risk is knee-joint replacement or suffering knee problems for years.

Replace the protection regularly, it's a cheap insurance in the long run.

Blåkläder's kneepads come in four versions and are EN 14404-compliant. For advice on which to buy, please refer to the recommendations and certifications for our trousers.

For kneepads, see page 286.

Pro EVA knee pads that are wide-fitting and extremely durable. The sturdy front section protects against sharp objects and unevenness in the substrate. Moreover, the pads have a soft interior and have an extra wide fit which guarantees that they will sit comfortably and remain in the right position.

4057

A lightweight, flexible service knee pad that moulds over the knee and contours to the shape of the trousers making it an excellent choice for anyone who needs flexible pads that are well-equipped to handle hours of work in a kneeling position.

4032

Durable knee pads suitable for floor layers or tilers. The knee pads are made from a 25-millimetre-thick gel material and have an extra wide fit which increases comfort and effectively protects your knees during long periods of work in a kneeling position.

4027

Our flexible knee pads are extramalleable. The sturdy front with its hard-wearing surface provides protection against sharp objects and the soft inside against the knee ensures maximum comfort.

4-WAY-STRETCH CRAFTSMAN TROUSERS

1522 craftsman trousers are made of a lighter-weight 4-way-stretch fabric that delivers the ultimate in comfort. The trousers have a slimmer fit and tighter look. CORDURA® stretch knee pad pockets, holster pockets one of which is zip-up, a ruler pocket and a hammer holder loop on both sides.

The mesh insert at the back of the knees provides good ventilation, which is most welcome on long, strenuous workdays.

The **1520** shorts version promises the same unbeatable comfort. The shorts have a slimmer fit and tighter look. Featuring holster pockets and bellowed pockets, one of which is zip up; a ruler pocket and a hammer loop holder on both sides. Ideal for hot days at work

OUR CLASSIC RAFTSMAN

The 1530 range is Blåkläder's classic basic model, our own original pair of trousers or 501. A simple but high-performance model with hammer holders on each side, crafted from our best fabric. Since we released our first collection in 1986, we've been continuously improving and developing the 1530 range without changing its classic look. We expect it will remain a favourite among craftsmen for many years to come.

4-WAY-STRETCH PAINTER TROUSERS

STRETCHY FOR PAINTERS

Blåkläder's most recent addition for painters comes in wonderfully soft 4-way stretch fabric which is strong and elastic in all directions. The 1079 painter's trousers with holster pockets and the 1089 without are designed to withstand demanding tasks without compromising comfort and fit. The trousers have advanced details and specially-designed pockets for brushes, putty and painting knives. The knee pad pockets are reinforced with CORDURA® stretch for greater ease of movement. Leg hem with reinforcement at the back provides effective protection against wear.

The **1088** shorts version of the **1079** painter's trousers offer unsurpassed softness and flexibility.

UNITE

BRING YOUR TEAM TOGETHER WITH UNITE

UNITE is a clothing collection that not only consolidates your team's identity, but also enhances your team's image and puts your company trademark and identity in the spotlight.

Blåkläder is launching a new UNITE collection for painters: a complete, coordinated collection of garments for hard-working painters who share our high expectations for quality, function and comfort. The new bottoms, which are available to purchase now, consist of two different types of painter's trousers with stretch panels (one with nail pockets and the other without) and a pair of painter's shorts with stretch panels in the crotch – all in a thinner and more flexible ripstop material which protects against rips and heavy wear. Other new items in the UNITE collection for painters include a softshell jacket, polo shirt, zip jumper and a hooded zip jumper. All you need to build team spirit.

FUNCTIONAL AND

FLEXIBLE FOR PAINTERS

These comfortable stretch painters' trousers with tapered legs are designed for the female figure. They offer ease of movement and are extremely soft. Featuring an elasticated waist for greater comfort plus a longer leg option. These trousers are engineered to stand up to tough jobs without compromising comfort and fit. They are crafted from a wonderfully soft 4-way-stretch fabric which is strong and durable and moves with the wearer in every direction.

The trousers have advanced details and specially-designed pockets for brushes and putty and painting knives, plus holster pockets. The knee pad pocket is reinforced with CORDURA® stretch fabric on the outside and stretch fabric on the inside for increased freedom of movement. Leg hem with reinforcement at the back provides effective protection against wear and tear. Also available in men's fit 1079.

TO PUT YOUR BUSINESS AHEAD OF THE GAME

Let's face it: "clothes make the man"; it's all in what you wear. And no matter if you're a bank manager, a football pro or a professional plumber — you deserve to look your best at work. That's how we see it, anyway.

As workwear is what we do best at Blåkläder. We have now brought out a brand new line for professional workers who want to unite the team.

The concept is simple and straightforward: sharply dressed co-workers give off an air of confidence and professionalism which will drive more business to your company.

We'll be right there with you, making sure your workwear keeps you together. After all - united, we're strong.

CHOOSE YOUR TEAM COLOUR AND PAIR IT WITH A PERFECT FIT!

MULTINORM INHERENT TROUSERS WITH STRETCH

EN ISO 11611

Protective clothing certified according to EN ISO 11611 provides the wearer with protection against small splashes of molten metal as well as transitory contact with flame. The garments certified according to this standard are suitable for users who weld or work in a similar industry.
The garments are classified based on their pro-

tective capacity against different levels of welding techniques which cause more or less spray and thermal radiation

Class 1 - Protection against less dangerous welding techniques and situations, which cause less spray and lower thermal radiation.

Class 2 - Protects against more risky welding techniques and situations, which cause higher levels of spray and thermal radiation.

(A1) Limited flame spread, surface ignition method.

(A2) Limited flame spread, edge ignition method.

EN ISO 11612

Protective clothing certified according to EN ISO 11612 provides the wearer with protection against transitory contact with heat and flame. The heat can be convection heat, thermal radiation, metal splash or a combination of these.

The garments are classified based on the following narameters:

- (A1) Limited flame spread, surface ignition method.
- (A2) Limited flame spread, edge ignition method.
- (B) Convection heat, scale 1-3 where 3 is best.
- (C) Thermal radiation, scale 1-4 where 4 is best
- (D) Molten aluminium splash, scale 1-3 where 3 is best.
- (E) Molten iron splash, scale 1-3 where 3 is best.
- (F) Contact heat, scale 1-3 where 3 is best

EN ISO 14116

Protective clothing complying with this International Standard is intended to protect the user against occasional and brief contact with small igniting flames, in circumstances where there is no significant heat hazard and without the presence of another type of heat. When protection against heat hazards is necessary, ISO 11612 is recommended.

Protective clothing according to EN ISO 14116 may consist of several separate garments, or a single garment with one or more layers. All assemblies claiming compliance with this standard shall achieve a limited flame spread index of 1, 2 or 3 when tested in accordance with ISO 15025.

Limited flame spread index

- Index 1 (flame spread, flaming debris and afterglow properties)
- Index 2 (as index 1 and included hole formation
- Index 3 (as index 2 and included afterflame properties)

If the index is 1 (lowest level) the garment can only be used outside a garment with index 2 or 3. Index 1 may not have skin contact, e.g. neck and wrist.

EN 1149-5

Protective clothing that is certified to EN 1149-5 must be used as part of an earthed system to avoid electrostatic discharges in explosive atmospheres

IEC 61482-2

Garments certified in accordance with the IEC 61482-2 standard provide a designated level of protection against the thermal hazards of an electric arc. The protective properties are designed to prevent the onset of second-degree burns. Other hazards of an electric arc, which the standard does not include, are molten metal splashes, pressure waves, electric shocks and hazardous gases created when a fabric is vaporised

IEC 61482-1-1

Open arc test; in this test, fabrics and garments are exposed to an open electric arc. Each fabric or combination of fabrics is given a value expressed as cal/cm² (calorific value). This value is the maximum incident thermal energy to which a fabric can be exposed and still provide protection against seconddegree burn injury; Arc Thermal Performance Value (ATPV), or when holes form in the fabric; Energy Break-Open Threshold (EBT). Both ATPV and EBT are calculated with a 50% probability of protection.

In 2019, an ELIM value was added to complement ATPV and EBT. This will specify the upper limit of incident energy to which a garment can be exposed without any risk of second-degree burn injury or the formation of holes in the fabric.

The higher the calorific value of the fabric or garment, the greater the protection for the wearer. These tests can also be carried out on combinations of fabrics/garments and thereby improve thermal protective performance.

IEC 61482-1-2

EN 61482-1-2 Box test: in this test, fabrics and garments are exposed to an electric arc confined in a box at a specific value. The arc current is 400 V and the duration is 500 ms. There are two classes for the test. The test gives a pass or fail result. Combinations of different garments or lined garments are often required to pass the box test Class 2.

	Electric arc	Time
Class 1/APC1	4kA – 168 kJ (400v)	500 ms
Class 2/APC2	7kA – 320 kJ (400v)	500 ms

EN ISO 13034

Protective clothing that is certified to FN ISO 13034 is not designed to provide full protection to the wearer when regularly handling chemicals. It is only suitable for use where there is a risk of exposure to weak chemical substances in spray form or accidental low-volume splashes The clothing provides enough protection to allow the wearer time to remove the clothing before any chemicals on the garment penetrate the fabric.

Available in two variants:

 $\textbf{TYPE 6} \ \text{protective clothing tested as a full one-piece suit } \textbf{TYPE PB [6]} \ \text{not tested}$ as a full one-piece suit. Any garment certified as PB [6] must be used in combination with other garments for full body protection and with other personal protective equipment.

MULTINORM INHERENT

The material used in 1512 is an inherent fabric, meaning that the flame retardant is integral to the molecular structure of the fibre and can neither be worn nor washed away. This is what makes inherent flame-retardant garments durable, light-weight, comfortable and permanently protective.

The fabric meets the standard for EN 1149-3, EN ISO 11611 class 1, A1+A2, EN ISO 11612 A1+A2,B1,C1,E1,F1, EN 61482-1-1 ATPV=11,9cal/cm², EN 61482-1-2 class 1, EN 13034, EN ISO 20471, HAF: 79,3%, LOI:29,6%.

We recommend professional industrial laundering for extended garment life. The reflectors are designed to withstand heavy-duty use and industrial laundering. If the garment is not laundered professionally, follow the care instructions. Softener or detergents with bleach should not be used.

WOMENSWEAR

FLAME RESISTANT WOMENSWEAR ?

1512 fabric is an inherent fabric which means that its flame retardant properties are built into the fibres. The flame retardant qualities exist within the molecular structure of the fibre and cannot be worn off or washed away. Inherent garments are therefore sustainable, lightweight, comfortable and guaranteed to protect against flames throughout the entirety of their service lives.

When your work requires the best possible flame retardant qualities and high durability, then look no further than the Blåkläder range of multinorm garments. Garments 4969, 7189 and 7188 are all designed for women and have ripstop materials which guarantee external tear resistance and resistance to wear in exposed working environments. The material complies with the following standards: EN 1149-3, EN ISO 11611 class 1, A1+A2, EN ISO 11612 A1+A2, B1, C1, E1, F1, EN 61482-1-1 11,9cal/cm², EN 61482-1-2 class 1, EN 13034, EN ISO 20471, HAF: 79.3% LOI: 29.6 %.

We recommend industrial laundering for a longer life. The reflective parts are designed for hard wear and industrial laundering. If the garment is not being washed professionally, follow the care instructions. Softener or detergents with bleach should not be used.

INHERENT STEEL

Quality 1519 is an inherent Class E3 fabric, specially designed for work in metal industries that deal with molten iron. The flame-retardant clothing in the Inherent Steel collection is designed to protect against splashing from molten metals. Garments in the Inherent Steel range include the jacket 4505, winter jacket 4515, trousers 1705 and the bib trousers 2605.

The fabric meets EN 1149-3, EN ISO 11611 Cl 1 A1, A2, EN ISO 11612 A1, A2, B1, C1, E3, F1, EN 61482-1-1 ATPV: 14cal/cm2 ELIM: 12cal/cm2, EN 61482-1-2 APC 1, EN ISO 20471, EN 13034, EN 15797.

We recommend industrial laundry for a longer product life (but not for lined winter jacket 4515). The reflectors are designed for hard wear and industrial laundry. If not washed professionally, follow the washing instructions. Do not use fabric softener or bleach detergents.

MULTINORM INHERENT

Our 1513 fabric is an inherent material, which means that the flame retardant properties are naturally present in its fibres. The flame retardant qualities exist within the molecular structure of the fibre and cannot be worn off or washed away. Inherent garments are therefore durable, lightweight, comfortable to wear and guarantee life-long flame protection.

The fabric complies with the following standards: EN 1149-3; EN ISO 11611 class 1, A1+A2; EN ISO 11612 A1+A2,B1,C1,E1,F1; EN 61482-1-1 ATPV= 16.0 cal/cm2; EN 61482-1-2 class 1; EN 13034; EN ISO 20471; GO/RT 3275.

Blåkläder combines the 1513 fabric with 1512 in all of its orange clothing, which is why the garments are marked on the outside with 11.9 cal/cm² instead of 16.0 cal/cm².

MULTINORM HEAVYWEIGHT

1514 fabric is a flame-retardant blend and was selected for its superior combination of strength and comfort. The cotton-rich fabric ensures wearability and maximum protection in one. The fabric is certified to EN 1149-3, EN 61842-1-1 APTV:11,0 cal/cm², HAF:82%, EN 61482-1-2 Class 1, EN ISO 11611 Class 1, EN ISO 11612 A1 A2 B1 C1 E3 F1, EN 13034, EN ISO 20471.

Styles 1478, 1479, 1578, 1579, 2607, 2608, 2678, 6378, 1869 are reinforced with knee pads in an inherent flame-retardant blend. The unique blend and high percentage of CORDURA® give the material enhanced durability.

We recommend professional industrial laundering for extended garment life. The reflectors are designed to withstand heavy-duty use and industrial laundering. If the garment is not laundered professionally, follow the care instructions. Softener or detergents with bleach should not be used.

Our 1530 fabric is a strong and durable inherent material, meaning that the flame retardant is built into the fibres. The material is also laminated for rain and wind protection. The garments are lined and have taped seams. The fabric is certified to EN 1149-3, EN 61482-1-2 Class 1, EN ISO 11611 Class 1, EN ISO 11612 A1 B1 C1 E3 F1, EN 13034, EN ISO 20471, EN 343 Class 4.1.

CORRECT CHOICE OF CLOTHES STARTS INSIDE AND OUT

THE LOOK OF AN ELECTRIC ARC

This is our winter jacket 4068-1530 with an result of ATPV 34 cal/cm² and ELIM 30 cal/cm², when tested in accordance with EN 61482-1-1.

ATPV-VALUE The Arc Thermal Performance Value (ATPV) value indicates the amount of energy (cal/cm²) to which the material/garment can be exposed and still provide a 50% protection against the second degree's burn.

EBT50-VALUE The Energy Break Open Threshold (Ebt50) value indicates the amount of energy (cal/cm²) to which the material/garment may be exposed before a 50% risk of hole formation occurs. The hole in the material/garment must not exceed 1.6 cm².

ELIM-value (Incident Energy limit)

As a complement to the ATPV and EBT value, an add-on for the Open Arc test is about a level for the Incident Energy Limit, called ELIM. ELIM is the upper limit of thermal energy a material / garment can be exposed without risking the second degree of burn for the wearer or hole formation in the material. For ATPV and EBT, there is always a (50%) risk that the second degree's burn or hole may occur.

Please check out the arc flash combination result on www.blaklader.com

HRC HRC categories; Hazard Risk Category Level (derived from the US Standard of Electrical Safety NFPA 70E)

HRC 1: 4-8 cal/cm² HRC 3: 25-40 cal/cm² HRC 2: 8-25 cal/cm² HRC 4: >40 cal/cm²

In the latest release of NFPA 70E, the HRC categories are referred to as PPE (Personal Protective Equipment) categories

EN 61482-1-2 Box test: in this test, fabrics and garments are exposed to an electric arc confined in a box at a specific value. The arc current is 400 V and the duration is 500 ms. There are two classes for the test. The test gives a pass or fail result. Combinations of different garments or lined garments are often required to pass the box test Class 2.

	Electric arc	Time
Class 1/APC1	4kA – 168 kJ (400v)	500 ms
Class 2/APC2	7kA – 320 kJ (400v)	500 ms

STRETCH IT IN HI-VIS

The 1193, 1197, 1993 and 1997 Hi-Vis trousers are Blåkläder's first in fantastic 4-way stretch fabric, which is strong and stretchable in all directions. The trousers are engineered to stand up to tough jobs without compromising comfort and fit.

The Hi-Vis trousers have advanced details and practical pockets with CORDURA® reinforcement, a bellowed thigh pocket with a zip, an internal phone pocket, a ruler pocket, extra-wide zip-up nail pockets, front pockets, back pockets with a flap and functional tool holders such as a hammer loop. The knee pad pockets are reinforced with CORDURA® stretch fabric on the outside and stretch fabric on the inside for increased freedom of movement. Soft, stretch mesh fabric at the back of the knee for good ventilation. CORDURA® reinforcement on the leg hem provides effective protection against wear.

VISIBLE SHELL JACKET

A shell jacket is perfect to use when dressing in layers. It is easy to keep warm and comfortable by adjusting what you wear underneath based on the weather. Wear a fleece jacket underneath to stay cosy if the weather is cold and simply remove a layer if you get too warm. A wind and waterproof shell jacket gives you optimal protection against windy

The 4496 is a new shell jacket that is certified as conforming to EN ISO 20471 Class 3, with laminated, stretchy ripstop fabric that provides outstanding tear resistance. The iacket has taped seams, extended sleeves with reinforced cuffs and carefully placed reflective trim which, along with the hi-vis fabric, guarantees the wearer is visible from all directions. The inside of the jacket has a brushed mesh lining and stretchy camo print for ultimate comfort and ease of movement.

- ALL-WEATHER PROTECTION

Maximize the possibilities with the Evolution collection where every detail has been developed with function and design in mind.

New to the collection is the 4498, a padded Hi-Vis jacket in 4-way stretch fabric with elasticated reflective detailing. The lining is made from recycled PET bottles, making this a fantastically lightweight, comfortable and pliable garment. Conforming to EN ISO 20471 Class 3 safety standards, this Hi-Vis jacket delivers outstanding moisture wicking performance and makes a good mid-layer under a shell jacket because of its light weight. The jacket has an ultra soft lining and padding so it almost feels like you're wearing a cloud.

EN ISO 20471

- PROTECTIVE CLOTHING WITH HIGH VISIBILITY

High-visibility clothing is undoubtedly the largest and fastest growing group of protective clothing today. Just like all other personal protective equipment, high-visibility clothing must be certified to be approved for use in the European market. The standard that specifies the performance requirements for high-visibility protective clothing is EN ISO 20471. As well as performance requirements, the design of high-visibility garments must also satisfy certain criteria.

The standard for high-visibility clothing is divided into three classes based on the minimum required amount of fluorescent and reflective material on the garment.

	CLASS 1	CLASS 2	CLASS 3
Fluorescent material	0,14 m2	0,50 m2	0,80 m2
Reflective material	0,10 m2	0,13 m2	0,20 m2

Each item of high-visibility clothing has a class rating, but it is possible to combine two items of clothing to attain a higher class rating than that of an individual item. A combination of clothing must also be certified to ensure compliance with all requirements for each class.

Blåkläder's Combination certification programme makes it possible to wear combinations of clothing to attain a higher protection class. The garments in the Combination certification programme are divided into classification categories which are printed inside each garment. The class of protection attained for each combination of garments is shown in the following table and on the label inside each garment.

Combination certification programme for Blåkläder's Hi-Vis collection:

		TOPS						
		Α	В	C	D	E		
BOTTOMS	٧	2	2	3	1	2		
	W	2	2	3	1	2		
	X	2	3	3	2	2		
	Υ	3	3	3	2	2		
	Z	3	3	3	3	3		

Example of combination certification; sweater item no. 3546 in classification category B and trousers item no. 1552 classification category Y are jointly certified as Class 3. Since Class 3 is the highest safety class, high-visibility garments in Class 3 are already at the highest level and are therefore not included in the programme.

LINED JACKETS

WARM, WATERTIGHT AND VENTILATED

Our wind and waterproof winter jacket is perfect for anyone who wants a jacket with extra ventilation properties. We've put in a mesh panel with vapour vents in both the shoulders and under the arms where you sweat the most. The jacket also has taped seams, quilted lining and a number of smart features like dark fabric panels for dirt-exposed areas and adjustable cuffs. The jacket is certified according to EN ISO 20471 and EN 343, foul weather protection. Along with the 1885 winter trousers, it is also certified according to EN 342, protective clothing against cold and low temperatures.

RAIN

4302 RAIN JACKET HI-VIS LEVEL 2, 1302 RAIN TROUSERS HI-VIS LEVEL 2, 2420 SAFETY RUBBER BOOT S5

CHOOSE A LEVEL BASED ON YOUR NEEDS

Our rainwear collection is called Level 1, Level 2 and Level 3. Each level has a standard fit and function, but with different jacket lengths and with or without high-visibility features. All levels have welded seams and are perfect for craftsmen, gardeners, road and construction workers, fishermen and others who work outdoors.

LEVEL 1

FOR TOUGH CONDITIONS

LEVEL 2

FOR TOUGHER CONDITIONS

LEVEL 3

FOR TOUGHEST CONDITIONS

_____ LEVEL 10 2 3

LEVEL 1 consists of basic styles in a pliable and lightweight fabric for those with jobs that require good range of motion and ease in putting on and taking off the garments as needed. The jackets feature smart functions such as a detachable hood, easily accessible pockets and storm closure to keep out the wet. They have a two-way zipper that extends all the way up into the collar and a detachable ID pocket on one of the jacket pockets. The trousers have an elastic band and drawstring at the waist. They have adjustable bottom hems and the legs are wide enough for easy changing without removing footwear.

LEVEL 1 2 3

RAIN FIGH TERS

LEVEL 2 is for those who need to wear more durable garments continuously for work. The features are enhanced in this level with breathable fabrics, and the jackets have a detachable hood as well as neoprene wristlets that retain body heat even when wet. The collars are in fleece on the inside for comfort and the sleeves are adjustable. The trousers have detachable braces and practical openings for the option of hanging nail pockets on the outside. They offer great fit and wearability thanks to the elastic waistband and snap-closure expansion inserts at the leg hems for easy changing without removing footwear.

WINTER PARKA EVOLUTION

EVOLUTION

- ALL-WEATHER PROTECTION

Max your capacity with our EVOLUTION range designed with performance and style in every detail. Wear as a coordinate, as an outer layer or separately. For unbeatable warmth, try our 4460 parka and defy the elements. Developed for extreme cold, with features such as an ultrasoft Thermore® thermal lining, windproofing, waterproofing and breathability.

The thermal jacket 4992 are designed as a combo to shell jackets, as a layer 2. A perfect match for cold conditions. The 4998 fleece jacket is the perfect midlayer, and is designed to fit perfectly under the shell jacket. With advanced materials to insulate you from the cold, it retains body heat while wicking away perspiration even during highintensity activities.

WHAT DOES IT MEAN WHEN IT SAYS A GARMENT

IS WATERPROOF AND BREATHABLE?

When we're outdoors in the rain and wind, we want clothing that keeps us dry and warm yet allows us to move freely without getting sweaty and clammy. All kinds of fabrics, from the ultra-thin stretchy to the more sturdy, classic rainsuits. are said to be both waterproof and breathable. How does that work?

Let's start with waterproofness. Fabric must normally have a waterproof rating of 3,000mm (3m) or more. Sounds simple enough, doesn't it? Well, it's not really that straightforward. There are lots of different test methods and each has different set-ups and procedures. So unless you can be certain that the same test method was used, it is tricky to compare figures.

The water column test is the most common method. This used to involve pouring water into a tube and then measuring how much pressure the fabric, pulled tight under the tube, could withstand. The principal is still

the same except that the tests are now automated. The EN ISO 811 & JIS L 1092 are examples of the test method. The rate at which water pressure is applied can differ in each test, producing very different figures.

It is the same for breathability, which can also be tested in numerous ways. The most common methods test the amount of water vapour that passes through fabric. Under two such tests, the JIS L 1099 & ASTM E96/E96M, the values should be high. Or fabric can be tested to measure its vapour resistance. In these tests, like the EN ISO 11092, the values should be low.

So the same fabric, tested in different ways, can achieve completely different performance values.

Fabric is laminated with a membrane to make it waterproof and breathable. Explained simply, laminating is the adhesion of a thin plastic film to the fabric. There are two main types; one has tiny microscopic pores that let vapour out but are too small to allow water droplets to come in. The other type has a material in the lamination film that wicks moisture from inside the garment and transfers it to the outside. This is most suitable for cold-climate clothing, as the wicking effect requires the temperature to be colder on the outside of the garment.

In both types, the lamination film makes the fabric waterproof.

Applying a coating of plastic-based material to the back or front of the fabric is another way of making it waterproof.

The face side of the fabrics is usually reinforced with a water-repellent finish to maximise their waterproofing qualities. This ensures the raindrops roll off the surface and stops water from being absorbed by the outer fabric, thus preventing clothing from becoming heavy and cold. It also helps to repel dirt, which can otherwise cause water to seep through the membrane.

We have tested water resistance and the ability to breathe on our materials 1977 & 1987 with different test methods. As you can see from this chart, we get different results depending on which method we choose.

WATER RESISTANCE

	EN ISO 811	EN ISO 811	JIS L 1092 B
Fabric	Water pillars tested according to the requirements in EN343. Pressure increase rate 10 cm/min.*	Water pillar. Pressure increase rate 60 cm/min.	Water pillar. Pressure increase rate 100 cm/min.
1977	≥20000 Pa/ ca 2000 mm (kl 4)	15 000 mm	17 000 mm
1987	≥20000 Pa/ ca 2000 mm (kl 4)	11 000 mm	22 000 mm

VENTILABILITY

	EN ISO 11092	JIS L 1099 B1	ASTM E96/ E96M
Fabric	Steam resistance tested according to requirements in EN 343. (kl 4 = ≤15). Ret	Steam passage	Steam passage
1977	8,5 $\frac{\text{m}^2 * \text{Pa}}{\text{W}}$ (kl 4)	20 000 g/m²/24H	4 000 g/m²/24H
1987	6,3 ^{m² * Pa} (kl 4)	31 000 g/m²/24H	4 000 g/m²/24H

^{*} The test is usually stopped at 20 000 Pa which is the maximum limit for EN343, class 4. The values only refer to laminated textile.

LINED TROUSERS

SMART AND WARM

Our lined winter trousers will keep you warm and dry, through sleet and snow and even the most biting cold. The trousers are made of a wind and waterproof material with taped seams and great breathability. Certified according to EN342, protective clothing against cold and low temperatures, and to EN343, protection against extreme weather. The trousers have a number of smart features such as a raised waistband at the back, zippers up to the knees, opening inner snow lock, detachable elastic braces and discrete reflective detailing on the back pockets and down the sides of the legs.

WHY A SHELL JACKET?

A shell jacket is perfect to use when dressing in layers. It is easy to keep warm and comfortable by adjusting what you wear underneath based on the weather. Wear a fleece jacket underneath to stay cosy if the weather is cold and simply remove a layer if you get too warm. A wind and waterproof shell jacket gives you optimal protection against windy and rainy conditions.

A shell jacket:

- * Perfect to use when dressing in layers
- * Excellent mobility
- * Wind and waterproof outerwear

FLEECE

FLEECE

COMFORT AND **PERFORMANCE**

Blåkläder's lightweight, comfortable, warm and high-performance fleece jackets are always popular and stylish. Our range of jackets includes classic fleece and microfleece, which is a lighter, more elastic version of the fabric that is just as good at retaining warmth and has the same supple

A fleece jacket, and perhaps a microfleece jacket in particular, is ideal for wearing under other layers of clothing for extra warmth.

THE 3-LAYER PRINCIPLE:

ADAPT YOUR CLOTHING TO YOUR LEVEL OF EXERTION

WHEN WORKING HARD IT'S IMPORTANT TO KEEP WARM AND DRY. THE 3-LAYER PRINCIPLE MEANS REGULATING YOUR BODY TEMPERATURE BY ADDING OR REMOVING GARMENTS AS THE WEATHER OR WORK DICTATES.

TRANSPORT - LAYER 1

This layer wicks away moisture from the skin. An undergarment of wool or channel-stitched synthetic material absorbs moisture and wicks it away. Wool also regulates body temperature well. In cold weather it warms, and when the body heats up it cools. That means it is perfect to use even in clothing for warm environments.

Wool is famed for its self-cleaning properties. The wool's natural creatine works like a natural deodorant, keeping your garment fresher for longer

INSULATE - LAYER 2

The intermediate layer insulates while wicking the moisture further away. As the temperature drops, the intermediate layer insulates against cold and lets you maintain your body heat. If you get hot and sweaty, regulate your temperature by lightening your intermediate layer. Put on a flannel shirt, a fleece garment or an artificial fibre undergarment.

Our fleece garments combine style and function. Fleece warms when it's cold. It's also easy to wash, dries quickly and wicks away moisture from the body.

PROTECT - LAYER 3

This is the shield that protects you from cold, rain and wind. The breathable function releases moisture from inside so it can evaporate on the outside. The material is lightweight, easy to care for, has taped seams and an especially durable surface layer.

Real outerwear for hard work should have: Hidden cuffs at the end of sleeves and legs/Snow locks over zips/roomy, easy-access outer pockets/Warming fleece lining in front pockets/Drawstring for adjustable waist/Removable lining/Zip all the way up the collar.

HAT, SHOES & SOCKS

They say it's probably a myth that you lose most of your body heat through your head. But myth or not, it's still extremely important to apply the 3-layer principle to the head, too. The scalp has lots of sweat glands and if there's anywhere you want to be dry and warm, it's your head. If your feet become cold and wet you will freeze no matter what you have on the rest of your body. We recommend wearing functional socks that breathe and wick away moisture from the skin. Choose footwear that matches your profession and the time of year. In addition to protecting against water and oil, your footwear should be able to breathe, which is why leather, rather than synthetic, shoes are recommended. Shoes should never dry close to a heat source, so make sure you have at least two pairs of shoes so that one pair is always clean and dry when you need to go out to work.

BASE LAYER

UNDERWEAR TECHNICAL BASE LAYER

MATCH CLOTHES TO YOUR EXERTION. Blåkläder has developed a collection of base layers called UNDERWEAR SYSTEM. This unique collection gives you superior insulation with moisture-wicking properties that keep you warm and dry in all types of work conditions. Soft and comfortable with a body-hugging fit, the fabric insulates you while still effectively wicking moisture from the body to the next layer. Dress right - and start with a base layer from Blåkläder.

4799/1844 **UNDERWEAR SYSTEM**

1734 100% Merino wool, single- jersey, 160 g/m²

XLIGHT is a unique series of underwear of 100% Superfine Merino wool, meaning that the wool is extra thin and smooth with a comfortable feeling against the skin, no itching. The garments are perfect for use all year round thanks to the naturally temperature regulating effects of the wool.
The wool also has the ability to keep the garments free from bad odor, which makes them stay fresh for a long time.

You'll find more of this series on page 212.

6810/7202 **UNDERWEAR SYSTEM MEN & WOMEN**

1707 100% polyester, rib knitted, wicking, 170g/m²

The base layer LIGHT effectively transports humidity away from the skin. The singlet and the long under pants are made of polyester that is soft on the skin and keeps the body warm, dry and comfortable in all types of physical activity. The channel knitted fabric creates an air gap between the body and the clothing, increasing the insulation. Usable during all seasons, when you need functional breathability next to the skin.

WARM^{°C} 3-5

4891/1891 **UNDERWEAR SYSTEM**

1705 50% Merino wool, 50% polypropylene, rib knitted, wicking, moisture management, 235g/m².

A synthetic underwear's moisture transporting qualifications are being combined with the heat insulating capacity of the merino wool in this garment with two functions. This warm underwear top is produced in two layers ensuring the moisture to be transported away from the body to the outer layer, where it will be absorbed by the finely-fibred merino wool. Perfect for use during colder days.

XWARM fabric and design developed for the most extreme cold conditions. WARM keeps you warm and dry in cold conditions. XLIGHT is made of extra fine merino wool to keep you warm and dry at any time of year. LIGHT comes in handy when it starts to get colder and you need a base layer that keeps you warm and dry.

4899/7200 **UNDERWEAR SYSTEM MEN & WOMEN**

1732 100% Merino wool, rib knitted, moisture management, 200 g/m².

This warming base layer keeps the body warm and dry during cold weather. Warming zones located on shoulders, arms, back, behind and sides where you freeze the most. The base layer is made of 100% merino wool that provides superior insulation and humidity transportation qualities to keep you warm and dry. Don't freeze while working, keep warm and dry in cold

4894/1894 **UNDERWEAR SYSTEM**

1706 70% Merino wool, 30% polypropylene, terry knitted, wicking, moisture management, 275g/m²

This multi-functional clothing has everything one could ask of a base layer. XWARM regulate your temperature while keeping you warm and dry even in extreme cold. The material consists of an inner layer of channel knitted polypropylene which transport humidity away from the body and to the outer layer, where it is absorbed by the merino wool. Keep warm and stay dry during e.g stationary work in biting cold.

WARM C 3-5 XWARM C 3-20 XWARM C 3-35

4699/7299 **UNDERWEAR SYSTEM MEN & WOMEN**

1736 100% Merino wool, interlock, 260 g/m².

This warming underwear keeps your body warm and dry in cold weather. The two-tone styles are made from 100% merino wool with outstanding insulating and moisture-wicking properties to

XLIGHT THERMAL UNDERWEAR

IN 100% MERINO WOOL

- FOR ALL-SEASON TEMPERATURE CONTROL

XLIGHT is an outstanding range of thermal underwear made of 100% superfine merino wool for lightweight wearability and skin-kindly softness. These pieces are perfect to wear year-round thanks to the natural heat-regulating effects of the merino fibre. The antibacterial, self-cleaning properties of the pure wool keep you and your garment fresher for longer.

FLEXIBILITY FOR CRAFTSMEN

Blåkläder's superbly soft and stretchy, high-quality, functional craftsman trousers for women are made of 4-way-stretch fabric. The 7198 and 7192 trousers are designed for craftsmen.

The **7198** trousers with tapered legs are extremely soft and offer outstanding ease of movement thanks to their 4-way stretch. The craftsman trousers are engineered to stand up to tough jobs without compromising comfort and fit. Soft, stretch mesh fabric at the back of the knee ensures good ventilation and the reinforced inside leg hem provides effective protection against wear.

The **7192** is a thinner pair of craftsman trousers, also in wonderfully soft and supple 4-way-stretch fabric that really delivers ultimate comfort. Featuring stretch knee pad pockets, holster pockets one of which is zip-up, bellowed back pockets, a ruler pocket and a hammer holder with a loop.

These comfortable stretch painters' trousers with tapered legs are designed for the female figure. They offer ease of movement and are extremely soft. Featuring an elasticated waist for greater comfort plus a longer leg option. These trousers are engineered to stand up to tough jobs without compromising comfort and fit. They are crafted from a wonderfully soft 4-way-stretch fabric which is strong and durable and moves with the wearer in every direction.

The trousers have advanced details and specially-designed pockets for brushes and putty and painting knives, plus holster pockets. The knee pad pocket is reinforced with CORDURA® stretch fabric on the outside and stretch fabric on the inside for increased freedom of movement. Leg hem with reinforcement at the back provides effective protection against wear and tear. Also available in men's fit 1079.

COMFORT FOR **INDUSTRIAL PROFESSIONALS**

The 7144 women's trousers are part of Blåkläder's new industry collection of stretch workwear. Suitable for industrial laundry, these scratch-free trousers are crafted completely from 2-way stretch fabric and have an elasticated waistband to make for even more comfortable wearing. Concealed features include an inside ruler pocket, a zippered security pocket and press studs, all of which make these highly reliable trousers to wear when working in environments with sensitive surfaces. Reflective trim provides extra visibility when needed.

UNITE MATCH YOUR IDENTITY

Unite is a clothing collection available in women's cuts that not only consolidates your team's identity, but also enhances your team's image and places your company trademark and spirit in the spotlight. Match garments and colours to find the look that is just right for you!

7195, which is a pair of functional service trousers in ripstop material that are lightweight and durable with good tear resistance. Elasticated waist and stretch panels at the calves and inner thigh ensure excellent freedom of movement. The kneepad pockets are reinforced with CORDURA®-stretch. The trousers match well with the comfortable 3394 jumper and flexible 3851 softshell gilet – or with the flexible 4919 softshell jacket in the same colour scheme.

MATERNITY TROUSERS!

Blåkläder is continuing with its important and, for us, natural statement for women in the industry. Our maternity trousers are soft, comfortable and hard-wearing work trousers that are intended to facilitate physical work for as long as possible into pregnancy. It's simply a matter of natural rights, if you

The **7101** are scratch-free service trousers from Blåkläder's revolutionary maternity workwear collection. Crafted from 2-way-stretch fabric, the trousers have 4-way-stretch panels on the rear, crotch and knees. Magnetic buttons and concealed features make these highly reliable trousers to wear when working in environments with sensitive surfaces. Featuring an internal knee pocket, folding ruler opening and loops at the waist for a belt, so that the optional nail pocket can be added.

The 7100 are soft, comfortable and hard-wearing work trousers that are intended to facilitate physical work for as long as possible into pregnancy. Neither clothing nor pregnancy should be an obstacle to working. And that's where these trousers come in. These hi-vis trousers are crafted from comfortable 4-way-stretch fabric and are scratch-free with a magnetic fastening. Loops at the waist for a belt, so that the optional nail pocket can be added.

WAXAW

4-WAY-STRETCH HI-VIS TROUSERS

Designed for the female figure, these versatile and comfortable Class 1 trousers offer ease of movement and are extremely soft. They are engineered to stand up to tough jobs without compromising comfort and fit.

The smooth 4-way-stretch fabric is strong and gives in all directions. The trousers have advanced details and practical pockets with CORDURA® reinforcement, a bellowed cargo thigh pocket with a zip, a folding rule pocket, front pockets, back pockets with a flap and functional tool holders, for example loops to hold hammers.

The knee pad pocket is reinforced with CORDURA® stretch fabric on the outside and stretch fabric on the inside for increased freedom of movement. Soft, stretch mesh fabric at the back of the knee for good ventilation. CORDURA® reinforcement on the leg hem provides effective protection against wear. Certified under the EN ISO 20471 standard, Class 1 hi-vis protective clothing. Combination certification group W.

LIGHTWEIGHT, STRETCHY AND STRONG

Lightweight jacket with a feminine cut. The softshell fabric makes it extremely soft, supple and comfortable. The two-tone jacket has contrasting colours on exposed areas for optimal visibility and safety when most needed. This designer Hi-Vis jacket is certified to safety standards and has the lightweight and stretchy feel plus the strength that is required of high-performance workwear. In addition, the fabric is waterproof and the hood can be removed when not needed. Certified under the EN ISO 20471 standard, Class 2 Hi-Vis protective clothing. Combination certification group B.

FLAME RESISTANT WOMENSWEAR ?

1512 fabric is an inherent fabric which means that its flame retardant properties are built into the fibres. The flame retardant qualities exist within the molecular structure of the fibre and cannot be worn off or washed away. Inherent garments are therefore sustainable, lightweight, comfortable and guaranteed to protect against flames throughout the entirety of their

When your work requires the best possible flame retardant qualities and high durability, then look no further than the Blåkläder range of multinorm garments. Garments 4969, 7189 and 7188 are all designed for women and have ripstop materials which guarantee external tear resistance and resistance to wear in exposed working environments.

The material complies with the following standards: EN 1149-3, EN ISO 11611 class 1, A1+A2, EN ISO 11612 A1+A2, B1, C1, E1, F1, EN 61482-1-1 11,9cal/cm², EN 61482-1-2 class 1, EN 13034, EN ISO 20471, HAF: 79.3%

We recommend industrial laundering for a longer life. The reflective parts are designed for hard wear and industrial laundering. If the garment is not being washed professionally, follow the care instructions. Detergents or detergents with bleach should not be used.

ANTISTATIC PROPERTIES AND ESD

All safety footwear in the Blåkläder range is antistatic. In addition, we offer footwear that is verified as ESD products. Both antistatic and ESD properties are evaluated in order to prevent electrostatic discharge. However, there is an important difference; the antistatic specification in the EN ISO 20345 standard is designed to protect the person wearing the footwear, while the requirements of the ESD standards (IEC61340-5-1) are designed to protect the product being handled by the person wearing the footwear.

Blåkläder's ESD safety footwear is approved by RISE, Research Institutes of Sweden;

www.ri.se

RULES AND STANDARDS FOR SAFETY FOOTWEAR

It is important that your feet get the protection they deserve – this is essential in order for you to be able to continue with your work.

The entire range of Blåkläder's safety footwear is certified in accordance with current standards and complies with European Personal Protective Equipment. You can feel confident that your protective shoes from Blåkläder comply with all important rules and requirements.

The table below shows the various protection classes. There is also a number of additional tests – see the information box

SAFETY FOOTWEAR, TABLE FOR EN ISO 20345:2011 STANDARD

Classification explanation;

Class I Footwear made from leather or other materials, excluding all-rubber/-polymeric materials. **Class II** Footwear made from all-rubber or all-polymeric materials.

The footwear categories include different levels of protection. In addition to these properties other protection classes may be added;

S The footwear has a toe cap **E** Energy absorption of heel area

P Penetration resistance WR Water resistant

A Antistatic footwear WRU Water resistant upper part

HI Heat insulation of sole complex HRO Resistance to hot contact of outsole

CI Cold insulation of sole complex FO Resistance to fuel oil

Levels of slip resistance;

SRA Slip resistance on ceramic tile floor with sodium lauryl sulphate

SRB Slip resistance on steel floor with glycerol

SRC SRA + SRB

ESD IEC 61340-5-1: Intended to prevent electrostatic discharge that can damage equipment or products. Approved resistance less than 35 $M\Omega$.

SOCK SYSTEM

FOR ALL WORKING AND WEATHER CONDITIONS

Well-being, productivity and concentration are all affected negatively if you get too hot or cold. Dress properly by selecting suitable under garments. Blaklader has developed a new collection of socks for all types of work situations. The collection is named SOCK SYSTEM and will keep your feet warm, dry and comfortable regardless of the weather conditions.

XWARM SOCK

Keep you warm and dry even in severe cold.

WARM SOCK

Keep you warm and dry in cold conditions.

LIGHT SOCK

Are comfortable and functional as an insulating layer for everyday use.

DRY SOCK

Keep you dry and fresh all day.

2193

tight fit.

XWARM SOCK

1096 60% wool, 20% acrylic.

18% polyamide, 2% elasthane

Knee length socks designed for

absorb moisture and have an in-

sulating layer of air between the

foot and shoe. Elasthane thread

in technically knitted areas for a

extremely cold weather condi-

tions. The socks control heat,

۵

2192

WARM SOCK

1095 54% wool, 24% acrylic, 20% polyamide, 2% elasthane

Designed to keep you warm in colder weather. The socks are moisture wicking, durable and have a thick sole for extra support. Elasthane thread in technically knitted areas for a tight fit.

LIGHT SOCK

1094 60% wool, 38% polyamide, 2% elasthane

Soft and comfortable socks designed for all seasons. The socks keep dry, warm and has functional breathability as well as an air pocket between the foot and shoe providing extra insulation. Elasthane thread in technically knitted areas for a tight fit.

2190

DRY SOCK 2-PACK

1093 80% polyester (coolmax), 17% polyamide, 3% elasthane

Perfect to wear as a base layer. The socks have moisture wicking which keeps dry and fresh. Elasthane thread in technically knitted areas for a tight fit.

Smooth grip texture. LINER: 13 gauge polyester. AREA OF USE: Dirty environments. Oily environments. Assembly work. Precision work. DISPLAY: Colour coded size indication on cuff. The gloves are not put together in pair.

CERTIFICATION: EN 388 (3121X) PPE cat 2.

PRECISION TASKS AND TOUGH JOBS

Blåkläder's work gloves with nitrile-dipped coating can handle most tasks and situations. The soft, supple all-round gloves are dipped with nitrile foam coating to ensure an excellent grip and good fit.

The micropore fabric on the palm allows moisture to escape, which means your hands won't get sweaty and uncomfortable.

These gloves are suitable for assembly work and other tasks where high tactile sensitivity is required. Thanks to their durable quality, they're tough enough for all kinds of challenges.

NITRILE-COATED WORK GLOVES

1456 Nitrile smooth, 15 gauge **9400** Grey

LINED WORK **GLOVES**

Blåkläder's lined work gloves are available in a range of different designs to enable users to select the most appropriate glove for particular needs, task and environment.

It all comes down to your requirements - Blåkläder offers a wide range. Extremely hard-wearing and long-lasting for heavy-duty work. Flexible knitted fabric for tasks requiring meticulous precision. Or waterproof and secure grip for use in wet environments. These are just a few of the gloves in Blåkläder's range of lined work gloves.

2960

WORK GLOVES LINED, LATEX COATED

1450 Latex, 10 gauge **5300** Orange

FUNCTIONALITY: Chrome free. Waterproof palm. LINING: Warm lined. Terry knit on the inside. PACKAGING: Price/pair. Sold in bundles of 6 pairs. 72 pair/box. DIPPING: Palm dipped. Latex. Sandy grip texture. LINER: 10 gauge acrylic. AREA OF USE: Cold environments. burnoments. Humid environments. Assembly work. Heavy duty work. DISPLAY: Colour coded hook with size. CERTIFICATION: EN 388 (0121X) PPE cat 2. EN 511 (01X).

2962

WORK GLOVES LINED WR, LATEX COATED

1451 Latex, 10/13 gauge **5300** Orange 7-11

FUNCTIONALITY: Chrome free. Waterproof. LINING: 10 gauge acrylic with terry knit on the inside. PACKAGING: Price/pair. Sold in bundles of 6 pairs. 72 pair/box. DIPPING: Double dipped. Fully dipped. 9900 Black 7-12

FUNCTIONALITY: Water proof membrane. Chrome free. LINING: Membrane. Fleece lining. DETAILS: Open collar. PALM: Water repellent synthetic leather palm. UPPER HAND: Upper hand in spandex. FINGERS: Reinforced fingertips. PACKAGING: Sold in pairs. AREA OF USE: Cold environments. Dirty environments. Humid environments. Wet environments. Assembly work. CERTIFICATION: EN 388 (0221X) PPE cat 2.

WORK GLOVES LINED

3945 Synthetic leather, spandex, 100g thinsulate **9900** Black 8-12

FUNCTIONALITY: Chrome free. LINING: 100G Thinsulate lining, DETAILS: Snow gaiter. PALM: Rubber-reinforced palm. FINGERS: Reinforced nonslip fingertips. WRIST: Velcro closure. PACKAGING: Sold in pairs. AREA OF USE: Cold environments. Dirty environments. Assembly work. Precision work. CERTIFICATION: EN 388 (2122X) PPE cat 2. EN 511 (120).

WORK GLOVES LINED LEATHER,

3923 Grain deerskin, strech spandex, neoprene, 60 g thinsulate 9933 Black/Hi-vis yellow

LINING: Water-repellent/moisture-penetrating lining. SAFETY: Neoprene reinforcement over knuckles. WRIST: Velcro closure. PACKAGING: Sold in pairs. AREA OF USE: Cold environments. Assembly work. CERTIFICATION: EN 388 (2132X) PPE cat 2. EN 511 (120).

2238

WORK GLOVES LINED LEATHER

3922 Grain deerskin, polyester/cotton canvas, 100 g thinsulate 9933 Black/Hi-vis yellow

LINING: 100G Thinsulate lining. SAFETY: EVA foam over knuckles. Quitted PU reinforcement on back of thumb. PALM: Bowl-shaped palm. Reinforced palm. FINGERS: Seamless fingertips. WRIST: Nylon strap for adjusting wrist width. Velcro closure. PACKAGING: Sold in pairs. AREA OF USE: Cold environments. CERTIFICATION: EN 388 (1143X) PPE cat 2. EN 511 (120).

WELDING AND HEAT PROTECTION GLOVES

Blåkläder's range of gloves that shield your hands from welding spatter, sparks and heat deliver the highest level of protection wherever you are working.

The **2839** welding gloves are made of grain goatskin with seams stitched with aramid thread, which withstands high temperatures. The extra long cuff keeps welding spatter and sparks off the arms. Tight fit for increased dexterity.

The **2840** are perfect gloves when performing really heavy work in hot environments. Made of split leather with a thin cotton fleece lining to provide insulation and protection against extreme heat. Seams stitched with aramid thread for extra resistance to high temperatures. The extra long cuff keeps welding spatter and sparks off the arms.

2839

WELDING GLOVES

1460 Full grain goatskin 1098 White/Dark grey

LINING: Unlined. DETAILS: Extended cuff in split leather. Seams in aramid thread. PALM: Palm in goatskin. UPPER HAND: Goat grain. PACKAGING: Price/pair. Sold in bundles of 6 pairs. 72 pair/box. AREA OF USE: Dirty environments. Hot environments. Precision work. TIG-welding. CERTIFICATION: EN 388 (2122X) PPE cat 2. EN 407 412X4X. EN 12477 Type A/B.

2840

HEAT PROTECTION GLOVES

1461 Split cowhide **7598** Brown/Dark grey

LINING: Lined. DETAILS: Extended cuff in split leather. Seams in aramid thread. PALM: Split cow hide. UPPER HAND: Split cow hide. PACKAGING: Price/pair. Sold in bundles of 6 pairs.. 60 pair/box. AREA OF USE: Dirty environments. Hot environments. For mining, Heavy duty work. CERTIFICATION: EN 388 (3244X) PPE cat 2. EN 407 413X4X.

3946 PE/PA, Nitrile 9990 Melange Black/Grey

FUNCTIONALITY: Chrome free. LINING: Unlined. DETAILS: Rib-knitted cuff. Seamless, PALIN: Nitrile covered palm. PACKAGING: Sold in pairs.

SECURITY CLASS: Cut protection level D. DIPPING: Sold in pairs.

SECURITY CLASS: Cut protection level D. DIPPING: Palm dipped. Nitrile.

Breathable microporous coating. Foamed grip texture. LINER: Metal fibre free. AREA OF USE: Ditry environments. Oily environments. Heavy duty work. Metal work. CERTIFICATION: EN 388 (4X43D) PPE cat 2.

FIND THE RIGHT GLOVES FOR YOU

Decide first what type of gloves you need. Blåkläder has a wide range of work gloves for all kinds of tasks and situations. It's very important for us and our customers to find exactly the right match.

Our glove guide is designed to make it easier and quicker for you to do just that. Find exactly the right type of gloves for the work you do.

Use the table below to compare applications, features, performance, palm fabric and coating with the type of glove you want and how you'll be using it.

GLOVES REQUIREMENTS, TESTS AND STANDARDS

EN420 PROTECTIVE GLOVES

- GENERAL REQUIREMENTS AND TEST METHODS.

The general requirements for protective gloves include:

- · Standardised dimensions for sizes; with respect to the size of the hands the gloves are to fit
- The gloves should not impose a risk or cause injury or allergies.
- The glove material should have a pH value between 3.5 and 9.5 (neutral).
- The highest permitted value for chrome VI in the glove material is 3 mg/kg.
- Marking of gloves and packaging is also standardised.

Protective gloves that protect against the cold.

Performance level	
Test	Levels
Convective cold	0-4, where 4 is best
Contact cold	0-4, where 4 is best
Ability to withstand water (5 minutes)	0 or 1 *

- * 0 = Water penetration after 5 minutes
- 1 = No water penetration after 5 minutes
- X =The property is not applicable to the current glove model

Explanation of performance levels						
Performance level	Lowest conditions for use [°C] Low activity	Lowest conditions for use [°C] Medium activity	Lowest conditions for use [°C] High activity			
1	-	10	-15			
2	-	0	-30			
3	8	-15	-			
4	-10	-30	-			

The table is relevant for ambient air temperature at a wind speed of $0.5\,\mathrm{m/s}$.

In this standard, gloves are tested for the following risks:

- Resistance to abrasion
- Cut durability
- Tear resistance
- Puncture resistance

For each test, a result is obtained according to the table below.

Performance level					
Test	Level 1	Level 2	Level 3	Level 4	Level 5
Durability (Number of cycles)	100	500	2000	8000	-
Cut resistance Coupe (Index)	1.2	2.5	5.0	10.0	20.0
Tear resistance (N)	10	25	50	75	-
Puncture resistance (N)	20	60	100	150	-

- ${\tt 0} = {\tt The}$ glove lies under the lowest performance level for the specific test.
- X =The property is not applicable to the current glove model

Performance level						
	Level A	Level B	Level C	Level D	Level E	Level F
Cut resistance TDM (N)	2	5	10	15	22	30

PROTECTIVE GLOVES AGAINST THERMAL RISKS [HEAT AND/OR FIRE]

	PERFORMANCE LEVEL
Protection from ignition	1-4, where 4 is the highest performance level
Contact heat	1-4, where 4 is the highest performance level

* Performance levels 3 and 4 are only specified if Protection from ignition is performance level 3 or higher. Otherwise Contact heat is specified in performance level 2

The results for the following properties are only specified if Protection from ignition is performance level 3 or higher;

	PERFORMANCE LEVEL
Convective heat	1-4, where 4 is the highest performance level
Radiant heat	1-4, where 4 is the highest performance level
Small splashes of molten metal	1-4, where 4 is the highest performance level
Large quantities of molten metal	1-4, where 4 is the highest performance level

All types of gloves certified as compliant with the EN 407 standard must meet at least the requirements of EN 388 Class 1 in Resistance to abrasion and Tear resistance.

PROTECTIVE GLOVES FOR WELDERS

Additional requirements to EN 407 specifically for welding gloves, including longer length.

The gloves are classed as type A and/or B;

	REQUIREMENT FOR MINIMUM PERFORMANCE LEVEL					
Requirement	EN standard	Туре А	Туре В			
Resistance to abrasion	EN 388	2	1			
Cutresistance	EN 388	1	1			
Tear resistance	EN 388	2	1			
Puncture resistance	EN 388	2	1			
Protection from ignition	EN 407	3	2			
Contact heat	EN 407	1	1			
Convective heat	EN 407	1	-			
Small splashes of molten metal	EN 407	3	2			
Flexibility	EN 420	1 (min Ø 11 mm)	4 (min Ø 6,5 mm)			

Test to measure vertical resistance can be added for gloves intended for arc welding.

GLOVE SIZES

Remember it is important to choose the right size of gloves for your hands. Gloves that are too large may pose a safety risk and affect your grip. Gloves that are too small may be less comfortable and have a poor ergonomic fit. Use the chart to help you choose the right size of gloves for your hands.

Two things you should consider regarding size and measurement are:

- $\, \cdot \,$ The circumference of your hand
- The length of your hand

Using a soft tape measure and with your hand open, measure the circumference of your hand around the knuckles.

Measure the length of your hand from the line of your wrist to the tip of your middle finger.

GLOVE SIZE	CIRCUMFERENCE	LENGTH (MM)	GLOVE MINIMUM LENGTH (MM)
6	152	160	220
7	178	171	230
8	203	182	240
9	229	192	250
10	254	204	260
11	279	215	270

WHICH KNEE PADS ARE RIGHT FOR ME?

Choosing knee pads is not always simple. Blåkläder's knee pads are designed to provide maximum protection against wear and tear on your knees when you're working in a kneeling position. But the best choice of pads depends on what kind of work you're doing and what trousers you're wearing. Factors to consider when choosing knee pads are:

- How long you will be kneeling
- How uneven the surface is
- How much you will be moving about on your knees
- What trousers you are wearing
- · Your weight

If you work frequently and for prolonged periods on your knees, we recommend heavy-duty knee pads like the 4027, 4032 and 4058. These provide enhanced protection when kneeling on uneven surfaces. Because they are thicker, they offer better thermal protection than thin knee pads which is important to take into account if working, for example, outdoors in the winter.

Remember that if you wear trousers with a narrow fit or a small size, you need to choose knee pads to match. We recommend Blåkläder's 4027 and 4057 narrow

style knee pads. If you wear trousers with a standard or wider fit or a larger size, you need to choose wider knee pads that will not slip to the side when you kneel down. Choose either the 4058 or 4032 knee pads.

In general, people who are heavy require knee pads that are sturdier and thicker to prevent wear and tear on the knees. Our 4058 or 4032 knee pads are the right choice.

We highly recommend our 4057 knee pads if you occasionally work on your knees and are looking for very flexible and lightweight knee pads. They are also suitable for people who are lightly built and who spend extended periods kneeling on the job

HOW OFTEN SHOULD I CHANGE KNEE PADS?

There are no hard and fast rules for how often you should change knee pads. You can check the knee pads every time you remove them to wash your work trousers. It is time to change them when they start to look compressed and worn out. It is important that you check your knee pads regularly if you spend a lot of your work time on your knees.

ID HOLDER

9900 Black

One size

DETAILS: Removable ID pocket.

THIS IS HOW YOU FIND THE RIGHT SIZE!

Take your measurements according to the instructions below. Wear close fitting underwear when measuring. Width is measured around circumference. Check the sizes available in each garment before ordering. Not every size is made in each model.

HOW TO TAKE YOUR MEASUREMENTS

A Chest

Measure horizontally across the widest part of the chest/bust. Make sure you keep the tape measure straight across your back.

B Waist

Men and children: Measure horizontally at navel height. Women: Measure horizontally across the narrowest part of the waist.

C Hip

Measure horizontally across the broadest part of the hip.

D Inside leg

Measure from crotch to just below the ankle bone. Make sure you keep the tape measure straight.

MEN'S SIZES

WASHING AND CARE INSTRUCTIONS – FOR LASTING FUNCTION AND DURABILITY

The correct wash cycle, care and storage of your workwear is important for its durability, function and long term comfort. The right care is also conditional in order to guarantee specific functions in the garment. An example is that a Hi-Vis garment may be less effective and therefore, less safe if it remains dirty. Please note the following care and washing instructions.

WASH

Every product has specific washing instructions, which are important to follow. They are suited to the particular garment's material and design. Where the washing instructions say "wash separately", this should be done. Alternatively, the garment can be washed with similar colours. Blåkläder estimates that woven materials will shrink up to 3% and knitted material/jerseys up to 5%. Avoid shrinkage by ironing your clothes after washing them. Certain clothes may need to be shaped somewhat to retain their form. It is also important that zips, buttons and Velcro closures are closed when the garment is washed. This reduces wear and tear and lengthens the garment's life.

PRE-WASH

The garments do not normally need pre-washing. In case of heavy soiling, pre-wash can be used, with the same quantity of detergent as used in the main wash. Do not soak the wash in advance as undissolved detergent can damage the garments.

DETERGENT

Use laundry detergent for coloured garments. Do not use laundry detergent containing bleach. Check that the laundry detergent is intended for the garment's wash temperature. Follow the washing instructions on the laundry detergent pack.

Please be aware that fabric softeners can damage certain fabrics and their functions. For example, the breathability of water-repellent membranes can be impaired. We do not recommend the use of fabric softeners.

DRYING

We do not recommend tumble drying as an everyday solution. It is best to shake & smooth out the fabric, hang up or dry flat. If you do choose to tumble dry, follow the label temperature guide (1 or 2 'dots' on the icon) and do not allow the garment to dry completely as the greatest wear and shrinkage risk occurs at the latter stage of drying. Check the garment label carefully as there may be exceptions.

INDUSTRIAL WASH

Industrial wash involves a large scale, professional laundry environment, in contrast to home laundry. Garments labelled "industrial wash" are suitable for this type of laundry. The ISO 15797 certification deals with industrial washing & drying, temperature, detergents and reactive substances which may be used. We recommend a trial wash at the intended laundry.

HIGH-VISIBILITY GARMENTS

Soiling impairs the visibility of the hi-vis garment. For this reason, it is important to wash them frequently and to follow the washing instructions. Never wash Hi-Vis garments with laundry detergent containing bleach, because this impairs the garment's luminance. Hi-vis clothing can be stored in a dry, well-ventilated space. Where garments need repairing, this must be done using fabric and thread that meets the garment's standard.

SHOES

In order to fulfil the safety stated characteristics, it is important that the shoes are always used and tied correctly. Also pay attention if the shoes are subject to heavy wear – check that the soles, seams and uppers are intact. Clean the shoes regularly with a brush, remove any spots with a damp cloth and use shoe cream on the leather uppers. Never clean shoes with substances such as petrol, acids or solvents. The shoes should be stored in a dry, well-ventilated space. Never dry shoes next to a heat source such as a stove, radiator or drying cabinet. Let them dry slowly and well-ventilated at room temperature.

GLOVES

All gloves have a marking showing the correct certification and performance level. A damaged or badly fitting glove provides poorer protection, so you should always check the gloves before use. The gloves must not come into contact with fire. Take care when working with moving machine parts, because the gloves may get caught and cause damage to your hands. Store dry and cool. Please consult your gloves' marking for the correct washing instructions, or clean with a dry brush.

WASHING SYMBOLS

Here are explanations of some of the most common washing symbols that you can find on products from Blåkläder.

Normal wash at stated temperature

Gentle wash at stated temperature

Very gentle wash at stated temperature

Do not wash

Hand wash only

Do not bleach

Can be bleached

Do not tumble dry

Tumble dry max. 60°C, low temperature

Tumble dry max. 80°C, normal temperature

Hang dry

Dry flat

Drip dry

Do not iron

Ironing max. 110°C, low temperature without steam

Ironing max. 150°C, normal temperature

Ironing max. 200°C, high temperature

Do not dry clean

Dry clean

Mild dry clean

BLAKLADER THE QUALITY FACTS

YOUR OPINION

We listen closely to our customers, the people who work hard in Blåkläder working clothes. Feel free to tell us what you think of our clothes and what we can do to improve them. Write a post on Facebook or send an email to uksales@blaklader.com

OUR OWN DESIGN

Functional, comfortable garments with an attractive design. That's the result of long tradition, expertise and collaboration with users. We develop specially designed collections for companies that want to show off their own profile.

ISO 9001:2015

Blåkläder is ISO 9001-certified. We are continuously working to create quality in our products, our manufacturing and our business.

MANY SIZES AND COLOURS

Blåkläder has one of the industry's widest ranges of sizes and colours.

ISO 14001:2015

We are ISO 14001-certified, which means that we are constantly working to be as considerate to the environment as possible.

TAKING A BEATING SINCE 1959

Making rugged clothes is hard work. For over 60 years, we have developed our range of functional work clothes and shoes. Today we're one of Sweden's leading producers of heavy work clothes.

COMPLIANT AND SAFE PRODUCTS

In addition to ensuring compliance with European chemicals legislation, Blåkläder also requires our suppliers and products to be one step ahead of the regulations. Through a process of ongoing dialogue and sharing of knowledge, together with random quality testing of our products, we guarantee the safety of our products for our customers.

DISTRIBUTION

Blåkläder has offices in many European countries and in North America. We sell our garments via retailers around the world. We are constantly training the people who sell our products to ensure a high level of service throughout the distribution chain.

DEVELOPMENT

We listen closely to the market's demands for function and quality. We have testers in various industries who help us adapt and improve our products. Our aim is for at least ten percent of our sales to come from products that have been developed over the previous 18 months.

OUR FACTORIES

Through our factories, we have full oversight of the production process and are able to coordinate and limit the number of subcontractors. Limiting the number of business partners gives us greater transparency along the manufacturing chain. This allows us to maintain the highest standards of quality at every stage of production and ensure that our processes are sustainable.

TOUGH TESTING

Destroying clothing is a great way to develop it! Our lab tests wear and tear, rip and pull resistance, colour fastness and shrinkage. We regularly check our materials at independent test institutes.

SA 8000

Our factories operate in compliance with SA8000/BSCI, which are global social accountability standards for decent working conditions for the employees. Both standards are based on the ILO's core conventions, the UN's Universal Declaration of Human Rights and the UN's Convention on the Rights of the Child. This means that the performance of our factories is measured in eight areas important to social accountability: child labour, forced labour, health and safety, free association and collective bargaining, discrimination, disciplinary practices, working hours and compensation.

MATERIALS

Different professions have different requirements for the fabric in their garments. We work with fabric producers worldwide to create materials that meet these tough demands.

STORES

Blåkläder works hard to ensure the customer gets their order in full and on time. That is why our warehouse covers 40,000 m² with yearly deliveries of approximately 7 million garments. It is from this central hub we send garments worldwide.

LIFETIME WARRANTY

Blåkläder offers a lifetime warranty on its seams. Professional staff and modern equipment make this warranty possible. If a seam splits, as long as it has not been torn by sharp edges or tools, we will repair it or replace the garment. We consider a garment's life span to be up until it has holes worn in it or is otherwise no longer useful.

OEKO-TEX 100

Most of the materials and components in Blåkläder's products meet the requirements of Standard 100 by Oeko-Tex, Product Class 2. This means that the material is safe to wear in direct contact with the skin.

BETTER COTTON INITIATIVE

Since 2017, we have been sourcing our cotton via the Better Cotton Initiative; a programme aimed at reducing the environmental footprint of cotton production and improving the livelihoods and welfare of the farmers. Quite simply, improving the sustainability of cotton.

THE PPE DIRECTIVE/EN STANDARDS

Personal protective equipment is designed to protect the wearer against risks to their health and/or safety. Only PPE products that comply with the EU's Personal Protective Equipment (PPE) Regulation EU 2016/425 may be placed on the market within the European Member States (EU) and the European Economic Area (EEA).

Under the PPE Directive, it is the responsibility of the manufacturer to ensure that the product placed on the market complies with the legal requirements. The legislation is interpreted in standards that specify the actual requirements that apply to each specific type of personal protective equipment. The requirements cover protective performance, safe use, marking and technical documentation.

All PPE that is placed on the market within the EU and the EEA must bear the CE mark.

Under the legislation, personal protective equipment is divided into three categories:

Category I – Protective equipment of simple design where the end-user can assess the level of protection required. Products from Blåkläder: rainwear.

Category II – Protective equipment that is neither simple nor complex and protects against medium risks. Products from Blåkläder: hi-vis garments, safety footwear, protective gloves and knee pads.

Category III – Protective equipment of complex design that protects the wearer against dangers that may seriously or irreversibly damage health, the effects of which the end-user cannot identify in sufficient time. Examples of products from Blåkläder: garments that protect against the thermal effects of an electric arc

EN ISO 20471

Protective clothing certified according to EN 471/20471 provides the wearer with visibility in hazardous situations under all lighting conditions during the day and under the illumination of vehicle headlights in the dark. High requirements are set, including for the fabric's luminance and reflection

The garments are classified based on the area of visible material and in combination with the reflector area and specific design requirements.

	Background material (m²)	Reflective material (m²)
Class 1	0.14	0.10
Class 2	0.50	0.13
Class 3	0.80	0.20

EN 342

Protective clothing certified according to EN 342 provides the wearer with protection against cold surroundings. Requirements are set for insulation capacity as well as air permeability.

EN 343

Protective clothing certified according to EN 343 protects against precipitation such as rain or snow, fog and soil moisture. The garments and the seams are tested for their waterproofing and water resistance. The garments are classified based on waterproofing and water resistance to give a recommended working time.

EN ISO 11611

Protective clothing certified according to EN ISO 11611 provides the wearer with protection against small splashes of molten metal as well as transitory contact with flame. The garments certified according to this standard are suitable for users who weld or work with similar work.

The garments are classified based on their protective capacity against different levels of welding techniques which cause more or less spray and thermal radiation

Class 1 - Protection against less dangerous welding techniques and situations, which cause less spray and lower thermal radiation.

Class 2 - Protects against more risky welding techniques and situations, which cause higher levels of spray and thermal radiation.

(A1) Limited flame spread, surface ignition method.

(A2) Limited flame spread, edge ignition method.

EN ISO 11612

Protective clothing certified according to EN ISO 11612 provides the wearer with protection against transitory contact with heat and flame. The heat can be convection heat, thermal radiation, metal splash or a combination of these

The garments are classified based on the following parameters:

- (A1) Limited flame spread, surface ignition method.
- (A2) Limited flame spread, edge ignition method.
- (B) Convection heat, scale 1-3 where 3 is best.
- (C) Thermal radiation, scale 1-4 where 4 is best.
 (D) Molten aluminium splash, scale 1-3 where 3 is best.
- (E) Molten iron splash, scale 1-3 where 3 is best.
- (F) Contact heat, scale 1-3 where 3 is best.

EN ISO 14116

Protective clothing complying with this International Standard is intended to protect the user against occasional and brief contact with small igniting flames, in circumstances where there is no significant heat hazard and without the presence of another type of heat. When protection against heat hazards is necessary, ISO 11612 is recommended.

Protective clothing according to EN ISO 14116 may consist of several separate garments, or a single garment with one or more layers. All assemblies claiming compliance with this standard shall achieve a limited flame spread index of 1, 2 or 3 wher tested in accordance with ISO 15025.

Limited flame spread index

- Index 1 (flame spread, flaming debris and afterglow properties)
- Index 2 (as index 1 and included hole formation properties)
- Index 3 (as index 2 and included afterflame properties)

If the index is 1 (lowest level) the garment can only be used outside a garment with index 2 or 3. Index 1 may not have skin contact, e.g. neck and wrist.

EN 1149-5

Protective clothing that is certified to EN 1149-5 must be used as part of an earthed system to avoid electrostatic discharges in explosive atmospheres

IEC 61482-2

Garments certified in accordance with the IEC 61482-2 standard provide a designated level of protection against the thermal hazards of an electric arc. The protective properties are designed to prevent the onset of second-degree burns. Other hazards of an electric arc, which the standard does not include, are molten metal splashes, pressure waves. electric shocks and hazardous gases created when a fabric is vaporised

IEC 61482-1-1

Open arc test; in this test, fabrics and garments are exposed to an open electric arc. Each fabric or combination of fabrics is given a value expressed as cal/cm² (calorific value). This value is the maximum incident thermal energy to which a fabric can be exposed and still provide protection against second-degree burn injury; Arc Thermal Performance Value (ATPV), or when holes form in the fabric; Energy Break-Open Threshold (EBT). Both ATPV and EBT are calculated with a 50% probability of protection. In 2019, an ELIM value will be added to complement ATPV and EBT. This will specify the upper limit of incident energy to which a garment can be exposed without any risk of second-degree burn injury or the formation of holes in the

The higher the calorific value of the fabric or garment, the greater the protection for the wearer. These tests can also be carried out on combinations of fabrics/garments and thereby improve thermal protective performance.

IEC 61482-1-2

FN 61482-1-2 Box test: in this test, fabrics and garments are exposed to an electric arc confined in a box at a specific value. The arc current is 400 V and the duration is 500 ms. There are two classes for the test. The test gives a pass or fail result. Combinations of different garments or lined garments are often required to pass the box test Class 2.

	Electric arc	Time
Class 1/APC1	4kA - 168 kJ (400v)	500 ms
Class 2/APC2	7kA - 320 kJ (400v)	500 ms

EN ISO 13034

Protective clothing that is certified to EN ISO 13034 is not designed to provide full protection to the wearer when regularly handling chemicals. It is only suitable for use where there is a risk of exposure to weak chemical substances in spray form or accidental low-volume splashes. The clothing provides enough protection to allow the wearer time to remove the clothing before any chemicals on the garment penetrate the fabric.

Available in two variants:

TYPE 6 protective clothing tested as a full one-piece suit TYPE PB [6] not tested as a full one-piece suit. Any garment certified as PB [6] must be used in combination with other garments for full body protection and with other personal protective equipment

EN 407

Protective gloves against thermal risks (heat and/or fire)

	Performance level
Protection from ignition	1-4, where 4 is the highest performance level
Contact heat	1-4, where 4 is the highest performance level

* Performance levels 3 and 4 are only specified if Protection from ignition is performance level 3 or higher. Otherwise Contact heat is specified in performance level 2

The results for the following properties are only specified if Protection from ignition is performance level 3 or higher;

	Performance level
Convective heat	1-4, where 4 is the highest performance level
Radiant heat	1-4, where 4 is the highest performance level
Small splashes of molten metal	1-4, where 4 is the highest performance level
Large quantities of molten metal	1-4, where 4 is the highest performance level

All types of gloves certified as compliant with the EN 407 standard must meet at least the requirements of EN 388 Class 1 in Resistance to abrasion and Tear resistance.

+

EN 12477

Protective gloves for welders

Additional requirements to EN 407 specifically for welding gloves, including longer length. The gloves are classed as type A and/or B;

	Requirement for minimum performance level								
Requirement	EN standard	Туре А	Туре В						
Resistance to abrasion	EN 388	2	1						
Cut resistance	EN 388	1	1						
Tear resistance	EN 388	2	1						
Puncture resistance	EN 388	2	1						
Protection from ignition	EN 407	3	2						
Contact heat	EN 407	1	1						
Convective heat	EN 407	1	-						
Small splashes of molten metal	EN 407	3	2						
Flexibility	EN 420	1 (min Ø 11 mm)	4 (min Ø 6,5 mm)						

 $Test \, to \, measure \, vertical \, resistance \, can \, be \, added \, for \, gloves \, intended \, for \, arc \, welding.$

EN 511

Protective gloves that protects against cold.

Performance level					
Test	Levels				
Convective cold	0-4, where 4 is best				
Contact cold	0-4, where 4 is best				
Ability to withstand water (5 minutes)	0 or 1 *				

- * 0 = Water penetration after 5 minutes
- 1 = No water penetration after 5 minutes
- X = The property is not applicable to the current glove model

Explanation of performance levels								
Performance level	Lowest conditions for use [°C] Low activity	Lowest conditions for use [°C] Medium activity	Lowest conditions for use [°C] High activity					
1	-	10	-15					
2	-	0	-30					
3	8	-15	-					
4	-10	-30	-					

The table is relevant for ambient air temperature at a wind speed of $0.5\,\mathrm{m/s}$.

EN 388

In this standard, gloves are tested for the following risks:

- Resistance to abrasion
- Cut durability
- Tear resistance
- Puncture resistance

For each test, a result is obtained according to the table below.

Performance level								
Test	Level 1	Level 2	Level 3	Level 4	Level 5			
Durability (Number of cycles)	100	500	2000	8000	-			
Cut resistance Coupe (Index)	1.2	2.5	5.0	10.0	20.0			
Tear resistance (N)	10	25	50	75	-			
Puncture resistance (N)	20	60	100	150	-			

0 = The glove lies under the lowest performance level for the specific test.

X = The property is not applicable to the current glove model

Performance level						
	Level A	Level B	Level C	Level D	Level E	Level F
Cut resistance TDM (N)	2	5	10	15	22	30

Standardised dimensions for sizes; with respect to the size of the hands the gloves are to fit

The gloves should not impose a risk or cause injury or

The glove material should have a pH value between 3.5 and 9.5 (neutral).

The highest permitted value for chrome VI in the glove material is 3 mg/kg.

Marking of gloves and packaging is also standardised.

MATERIALS CHOSEN WITH CARE

1000	100% cotton, twill, 240gm²	Lightweight cotton fabric for high comfort. Oeko-Tex®100 certified material.
1010	100% polyester, microfleece, antipilling, 170g/m²	Polyester microfleece, antipilling, brushed on both sides. Oeko-Tex®100 certified material.
1011	100% polyester, birdseye knit, anti-odour treated, UV- protection, 130g/m²	Lighter knitted material that is anti-odour treated and have UV protection 40+. Oeko-Tex®100 certified material.
1013	100% polyester, birdseye knit, wicking, antiodour-treaded, UV-protection, 130 g/m²	Moisture transportation and lighter knitted material that is anti odour treated and has UV-protection (UP40+). Oeko-Tex®100 certified material.
1030	100% cotton, single jersey, 180 g/m²	Comfortable combed cotton. Oeko-Tex@100 certified material.
1035	100% cotton, pique knit, 220 g/m²	Oeko-Tex®100 certified material.
1042	100% cotton, single jersey, 150 g/m²	Comfortable combed cotton. Oeko-Tex@100 certified material.
1048	80% cotton, 20% polyester, terry knit inside brushed 360g/m^2	Terry knit, brushed inside. Oeko-Tex®100 certified material.
1050	60% cotton, 40% polyester, pique, 220 g/m²	Comfortable cotton and polyester material, good colorfastness. Oeko-Tex®100 certified material.
1051	100% polyester pique wicking, moisture transporting, UV protection, 155 g/m²	Quick-drying, moisture transportation and bamboo charcoal, cooling effect, UPF40+. Oeko-Tex®100 certified material.
1070	55% cotton, 45% polyester, pique UV, 185g/m²	Double face pique knit, soft cotton on inside, polyester on outside, EN ISO 20471, UPF40+. Oeko-Tex®100 certified material.
1075	78% wool, 20% modacrylic, 2% antistatic, merino interlock, flameretardant, 225 g/m²	Comfortable and warm wool quality in a knitted interlock with inherent flame retardant properties. The fabric is certified for EN ISO 11612, EN 1149-3, EN 61482-1-2, EN 61482-1-1.
1140	88% cotton, 12% polyamide, denim, coated, CORDURA® denim, 375g/m²	Extremely durable denim fabric. The mix of Cordura and cotton provides high abrasion properties and comfort. The fabric's durability is four times greater than for normal cotton denim of the same weight. Oeko-Tex@100 certified material.
1141	55% cotton, 30% polyester, 15% polyamide, denim, coated, CORDURA® Denim stretch, 340 g/m²	Extremely durable Denim fabric with stretch. The mix of CORDURA® and cotton provides high abrasion resistance and the stretch provides great comfort. Oeko-Tex®100 certified material.
1142	85% cotton, 15% polyamide, denim, coated, CORDURA® denim, 340g/m²	Extremely durable denim fabric. The mix of Cordura and cotton provides high abrasion properties and comfort. Oeko-Tex®100 certified material.
1145	75% cotton 25% polyamide, canvas, Cordura Nyco, 340g/m²	Extremely durable fabric combining the durability of Cordura and the comfort of cotton. The fabric's durability is four times greater than for normal cotton canvas of the same weight. Oeko-Tex®100 certified material.
1146	75% cotton 25% polyamide, canvas, Cordura Nyco, 250g/m²	Extremely durable fabric combining the durability of Cordura and the comfort of cotton. The fabric's durability is four times greater than for normal cotton canvas of the same weight. Öko-Tex 100-certified.
1152	100% cotton flannel, one side brushed, 180 g/m²	Classic flannel with one side brush. Is soft and comfortable. Suitable to wear both at work and at home.
1158	100% cotton, french terry, 320 g/m².	Oeko-Tex®100 certified material.
1310	100% cotton, canvas, 270 g/m²	$\label{lighter} \emph{Lighter} fabric for added comfort. Ideal for promotional/service use, but also useful for light craftsman work, indoors or in a warm climate. Oeko-Tex@100 certified material.$
1330	60% cotton, 40% polyester, ripstop 250 g/m²	Lighter fabric in Ripstop. High part of cotton gives comfort and in same time smooth and sustainable fabric. Excellent for both profile, service and also useful for light craftsman work, indoors or in a warm climate. Oeko-Tex®100 certified material.
1343	60% cotton, 40% polyester, canvas, 340 g/m²	Heavy canvas quality. The fabric is comfortable and airy but still durable. The garment is made of Oeko-Tex®100 certified material.
1370	100% cotton, twill, 370g/m²	Sanforized (pre-shrunk) tightly woven cotton. Soft, comfortable but hard wearing cloth. Resists weld spatter and grinding sparks, but is not treated for flame-resistance. $0eko-Tex@100$ certified material. Used by many tradesmen.
1501	79% cotton, 20% polyester, 1% antistatic satin, flame retardant antistatic 450g/m²	Heavy but still flexible fabric for hard environments. Certified for welding class 2. The fabric is certified EN 1149-3, EN 61482-1-2, EB 61482-1-2, ATPV 13,3 cal/cm 2 , EN ISO 11611, EN ISO 11612. Oeko-Tex $^{\odot}$ 100 certified material.
1504	98% cotton, 2% antistatic, flame retardant, antistatic, 230 g/m²	$Material\ 1504\ is\ an inherent\ retardant\ fabric.\ High\ part\ of\ cotton\ provides\ comfortable\ clothes.\ The\ fabric\ is\ certified\ to\ EN1149-3, EN61482-1-2, EN61482-1-1, ENISO\ 11612.\ Oeko-Tex@\ 100\ certified\ material.$
1512	44% modacrylic, 30% cotton, 20% FR polyamide, 5% aramid, 1% antistatic, ripstop, flame retardant, antistatic, 260 g/m²	Quality 1512 is an inherent fabric which means that the flame retardant is built into the fibers. It is durable, light and comfortable. The fabric is certified for EN 1149-3, EN 61482-1-2, EN 61482-1-1, EN ISO 11611, EN ISO 11612, EN 13034, EN ISO 20471, HAF 79,3%, LO 29,6%. Oeko-Tex® 100 certified material.
1513	40% modacrylic, 24% FR viscose, 20% polyester, 10% cotton, 4% Aramid, 2% Antistatic, double weave, flameretardant, antistatic, 310 g/m²	Quality 1513 is an inherent fabric which means that the flameretardant properties are built into the fibres. It is durable, light and comfortable. The fabric is certified for EN 1149-3, EN 61482-1-2, EN 61482-1-1, EN ISO 11611, EN ISO 11612, EN 13034, EN ISO 20471. Oeko-Tex®100 certified material.
1514	75% cotton, 24% polyester, 1% antistatic, twill, flame retardant antistatic, 350g/m²	Quality 1514 is a flame retardant fabric carefully chosen to create the best combination of strength and comfort. High proportion of cotton provides clothes that are comfortable to wear. The fabric is certified for EN 1149-3, EN 61482-1-2, EN 61482-1-1, EN ISO 11611, EN ISO 11612, EN 13034, EN ISO 20471, HAF 82%. Oeko-Tex® 100 certified material.
1515	54% modacrylic, 44% cotton, 2% antistatic, twill, flame retardant, antistatic, 180 g/m²	Quality 1515 is an inherent fabric which means that the flame retardant is built into the fibers. Easy and comfortable. The fabric is certified for EN 1149-3, EN 61482-1-2, EN 61482-1-1, EN ISO 11612, EN ISO 20471. Oeko-Tex® 100 certified material.
1516	85% cotton, 14% polyester, 1% antistatic, twill, flame retardant antistatic, 350g/m²	Quality 1516 is a flame-retardant fabric carefully chosen to create the best combination of strength and comfort. High proportion of cotton provides clothes that are comfortable to wear. The fabric is certified for EN 1149-3, EN 61482-1-2, EN 61482-1-1, EN ISO 11611, EN ISO 11612, EN 13034, EN ISO 20471, HAF 82%. Oeko-Tex® 100 certified material.
1532	59% viscose, 40% modacrylic, 1% Antistatic, laminated, waterproof 16 000mm, wind proof, breathable Ret 12,6, 250 g/m²	Quality 1532 is an inherent fabric which means that the flame retardant is built into the fibers. Wind-, and waterproofed and breathable. Certified according to EN 1149-5, EN 61482-1-2, EN 61482-1-1, EN ISO 11611, EN ISO 11612, EN 13034, EN 343, EN ISO 20471. Oeko-Tex® 100 certified material.
1642	94% polyester, 6% elastane, water repellent finish, 4-way stretch, 320g/m²	Soft 4-way stretch that is both strong and stretchable in all directions. The material is Oeko-Tex® 100 certified.
1644	, ,	Soft 4-way stretch that is both strong and stretchable in all directions. The material is Oeko-Tex® 100 certified.
1645	92% polyamide, 8% elastane, double weave, 4-way stretch 230 g/m²	Lightweight 4-waystretch that is both comfortable and durable. The fabric is Oeko-tex 100 certified.
1705	50% Merino wool, 50% polypropylene, rib knitted, wicking, moisture management, 235g/m².	WARM, rib knitted 2-layer material with polypropylene on inside and merino wool on outside, wicking, moisture management by merino wool. Oeko-Tex®100 certified material.
1706	70% Merino wool, 30% polypropylene, terry knitted, wicking, moisture management, 275g/m²	XWARM, terry knitted material with polypropylene and merino wool, wicking, moisture management by merino wool. Oeko-Tex®100 certified material.
1707	100% polyester, rib knitted, wicking, 170g/m²	LIGHT, wicking effect, knitted to keep warm. Oeko-Tex®100 certified material.
1725	59% modacrylic, 39% cotton, 2% antistatic, rib knitted, flame retardant, antistatic, 220g/m², Arc Rating 4,44 cal/cm².	Comfortable rib knitted fabric that keeps you warm, fulfills EN standards EN 11612, EN 61482-1-1, EN1149-3, EN 61482-1-2 class 1. Oeko-Tex®100 certified material.

1726	59% modacrylic, 39% cotton, 2% antistatic, pique knitted, flame retardant, antistatic, 220g/m², Arc Rating 6,3 cal/cm²	Comfortable pique knitted fabric, fulfills EN standards EN 11612 A1, B1, C1, EN 1149-4, EN ISO 20471. Oeko-Tex®100 certified material.
1732	100% Merino wool, rib knitted, moisture management, 200 g/m².	Extra warm and comfortable material in 100% Merino Interlock. Oeko-Tex®100 certified material.
1734	100% Merino wool, single- jersey, 160 g/m²	Extra light and comfortable single- jersey in 100% Superfine Merino Wool. The Inherently anti- bacterial, moisture- transporting and temperature- regulating properties of wool in this fine-fibre version is the perfect baselayer for most climates and activities
1736	100% Merino wool, interlock, 260 g/m².	Our warmest wool material in 100% merino interlock. The material is Oeko-Tex® 100 certified.
1737	60% modacrylic, 39% cotton, 1% Antistatic fibre, single jersey, flame retardent, antistatic 210g/m²	Comfortable and flexible single jersey with inherent flame retardant properties. The fabric is certified for EN ISO 11612, EN 1149-3, EN 61482-1-2, EN 61482-1-1.
1761	48% modacrylic, 42% cotton, 5% Aramid, 3% polyamide, 2% antistatic fibre, interlock, flame retardent, antistatic, 250 g/m²	A knitted material with inherent flame retardant features. It's an interlock that is soft and comfortable to wear. The fabric is certified for EN ISO 20471, EN ISO 11612, EN 1149-3, EN 61482-1-2, EN 61482-1-1.
1762	60% Modacrylic, 39% cotton, 1% antistatic fibre, fleece, flame retardent, antistatic, 280g/m²	A comfortable sweatshirt fabric in modacrylic- and cotton mix with best protection. The fabric is certified for EN ISO 11612, EN 1149-3, EN 61482-1-2, EN 61482-1-1.
1800	65% polyester, 35% cotton, twill, 240 g/m²	Lighter weight fabric which protects you from dirt and splashes, but also offer full freedom of movement. Excellent for both engineering and service industries. Colour fast and good shape retention. Oeko-Tex®100 certified material.
1804	85% polyester, 15% cotton, satin, 300g/m²	Fluorescent cloth which is both flexible and hard wearing. Oeko-Tex®100 certified material.
1811	65% polyester, 35% cotton, twill, water repellent finish, 240g/m²	Lighter quality that protects against dirt and splashes but, at the same time, maintains flexibility in the garment. Very suitable for industry and service. Colur and dimensionally stable. Water repellent finish. Oeko-Tex®100 certified material.
1812	85% polyester, 15% cotton, satin, water repellent finish, 245 g/m²	Oeko-Tex®100 certified material.
1830	63% polyester, 33% cotton, 4% elastolefin, twill, stretch, 245 g/m²	Lighter quality with stretch that protects against dirt and splash while retaining the mobility of the garment. Suitable for industry and service. Keeps color and shape. The material is certified for Oeko-Tex® 100.
1832	63% polyester, 33% cotton, 4% elastolefin, twill 2/1, stretch, 260 g/m²	Lighter quality with stretch that protects against dirt and splash while retaining the mobility of the garment. Suitable for industry and service. Keeps color and shape. The material is certified for Oeko-Tex® 100.
1845	65% polyester, 35% cotton, plain, 166g/m²	Light fabric for comfort in warm climate. Oeko-Tex®100 certified material.
1860	65% polyester, 35% cotton, twill, 300g/m²	Rugged, all-round polyester/cotton cloth. Soft, hard wearing and flexible. Very good shape retention and excellent comfort. All Blåkläder's functional tradesmen's garments are available in this cloth. The product is made of Oeko-Tex®100 certified material.
1919	100% polyester, 3-layer, laminated, Dermizax®, waterproof 20000mm, windproof, breathable 16000 g/m²/24H, 225 g/m²	High quality, wind and waterproof material with very good breathability. The material is flexible but still strong. The material is Oeko-Tex® 100 certified.
1921	100% polyester, dobby laminated, Dermizax®, waterproof 20 000 mm, windproof, breathable 20 000 g/m²/24H, 200 g/m²	High quality, wind and waterproof material with very good breathability. The material is flexible but still strong. The material is Oeko-Tex® 100 certified.
1924	100% polyester, 3-layer stretch, laminated, Dermizax®, waterproof 20000 mm, windproof, breathable 16000 g/m²/24H, 200 g/m²	High quality, wind and waterproof material with stretch and very good breathability. The material is flexible but still strong. The material is Oeko-Tex® 100 certified.
1977	100% polyester, oxford, laminated, waterproof 15 000 mm, windproof, breathable, Ret 8,5, 200g/m².	Wind- and waterproof fabric with breathable function. Oeko-Tex®100 certified and bluesign® certified material.
1987	100% polyester, twill, mechanical stretch, laminated, waterproof 11 000 mm, windproof, breathable, Ret 6,3, 150 g/m².	Wind- and waterproof fabric with breathable function and stretch effect. The garment is made of Oeko-Tex®100 and bluesign® certified material.
2510	100% polyester, microfleece, 260g/m²	Anti-pilling treated high quality fleece. Oeko-Tex®100 certified material.
2512	100 % polyester, double knitted interlock, 290g/m²	2-layer material, knitted fabric of softshell type. Stretch and good breathable function, suitable both as layer 2 and as lighter outerwear. EN20471 - certified (protective clothing with good visibility). Oeko-Tex®100 certified material.
2513	92% polyester, 8% elastane, 3-layer softshell, waterproof 10 000 mm, windproof, breathable Ret 20,0, stretch, 255 g/m²	Lightweight 3-layer softshell fabric with 4-way stretch. Wind- and waterproof, breathable. The fabric is Oeko-tex 100 certified.
2517	100% polyester, 3-layer softshell fabric, waterproof 10 000 mm, windproof, breathable Ret 7,2, 300g/m²	Softshell type 3-ply fabric. Wind- and waterproof fabric with breathable function. Oeko-Tex®100 certified material.
2518	94% polyester, 6% elastane, 3-layer softshell fabric, waterproof, windproof, breathable, 245g/m²	Softshell-type 3-layer, 4-way stretch. Exterior of polyester + elastane/TPU membrane. Inside 100% polyester. Wind and water repellent. The garment is made of Oeko-Tex®100 certified material.
2532	92% polyester, 8% elastane, fleece, one side brushed, quick dry, 240 g/m².	Extremely smooth and flexible material in knitted 4-way stretch with one side brushed. Oeko-Tex®100 certified material.
2536	97% polyester, 3% elastane, Jacquard knit, one side brushed, stretch, 290 g/m²	A stretchable jaquard knitted fabric with one side brush. The fabric is soft, comfortable and have good isolation. Oeko-Tex®100 certified material.
2955	100% Polyester pile 350g/m²	Classic pile quality that is soft and warm. Use as outer layer or as a warm layer two under a shell jacket. Oeko-Tex®100 certified material.
